Auditor of the management company

PriceWaterhouseCoopers België, Woluwe Garden, Woluwedal 18, 1932 Sint-Stevens-Woluwe, Belgium, represented by Damien Walgrave, company auditor and recognized auditor.

Financial portfolio management

Regarding the delegation of the management of the investment portfolio, please see the information concerning the sub-funds.

Financial service providers

The financial services providers in Belgium are:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels.

Custodian's activities

The custodian:

- a) Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- b) Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- c) Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- d) Carries out the instructions of , provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- e) Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevekwitwithin the usual terms;
- f) Ascertainsthat:
 - i. The assets in custody correspond with the assets stated in the accounts of the Bevek;
 - ii. The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
 - iii. The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;

- iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
- v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of has been booked to cash accounts that:

1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
 - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
 - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
 - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
 - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

Custody tasks delegated by the custodian

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this annual/half-year report. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

List of sub-custodians and sub-sub-custodians

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at www.kbc.be/investment-legal-documents.

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

Conflicts of interest

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: www.kbc.be/investment-legal-documents (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

1.2. Management report

1.2.1. Information for the shareholders

Pursuant to Article 3:6 of the Code of Companies and associations, information is supplied regarding the following:

- The investments of KBC Equity Fund Emerging Europe and KBC Equity Fund Emerging Markets include positions in shares listed on the Moscow stock exchange. Given the particular situation and the sanctions policy, these positions are valued at 0.01 RUB /share; the impact on the NAV can roughly be estimated at 0,010% and 246,81% respectively.

Reclaims of foreign withholding taxes on dividends.

In some Member States of the European Union domestic investment funds benefit from exemptions or refunds of withholding taxes when they receive dividends from a domestic entity. The same tax benefits do not apply to non-resident investment funds investing cross-border. Such tax system is not in accordance with the free movement of capital within the European Union.

Since 2006 KBC investment funds yearly file requests for a refund of discriminatory withholding tax paid on dividends in France, Spain, Italy, Germany, Finland, Sweden, Norway and Austria. Refunds have already been received from French, Norwegian, Swedish, Spanish and Austrian fiscal administration.

The funds no longer file requests in The Netherlands as a consequence of recent Dutch Court decisions.

There were no refunds this period.

1.2.1.1. Securities Financing Transactions (SFTs)

Except for the sub-fund applies:

General

Each sub-fund may lend financial instruments within the limits set by law and regulations.

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty in exchange for financial collateral and subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request. The counterparty pays a fee for this to the sub-fund.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

The sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.

General information on the SFTs used

Type of SFT	Types of asset that the SFT can involve	Maximum percentage of the assets under management that can be involved in the SFT	Anticipated percentage of the assets under management that will be involved in the SFT
Lending financial instruments	Only shares and bonds will be lent	When lending financial instruments a maximum of 30% of the assets under management will be involved.	Depending on market conditions 0–30% of the assets under management will be involved in the lending of financial instruments

Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

Legal status	Minimum rating	Country of origin
<p>The counterparty must belong to one of the following categories:</p> <p>a) A credit institution; or</p> <p>b) An investment firm; or</p> <p>c) A settlement or clearing institution; or</p> <p>d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate.</p>	<p>Only counterparties rated as investment grade may be considered.</p> <p>An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies:</p> <ul style="list-style-type: none"> - Moody's (Moody's Investors Service); - S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en - Fitch (Fitch Ratings). <p>If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration.</p>	<p>All geographical regions may be considered when selecting counterparties.</p>

The relationship with the counterparty or counterparties is governed by standard international agreements.

Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the office of the credit institution is situated within a member state of the EEA, or if the office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as defined in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

Policy on the diversification of collateral and the correlation policy

A sub-fund is not permitted to accept financial collateral issued by the party offering them.

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

Holding of the financial collateral

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Bevek's assets, as stated under 'B. Service providers to the Bevek'.

Influence of SFTs on a sub-fund's risk profile

This lending does not affect a sub-fund's risk profile since:

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.
- A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other or other specific types of securities with a low risk, such as government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.
- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

Distribution policy for returns on the utilised SFTs

By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.

1.2.1.2. General strategy for hedging the exchange rate risk

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale and/or the purchase of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

1.2.1.3. Social, ethical and environmental aspects

The investment policy takes into account certain social, ethical and environmental aspects against which issuers are being assessed. Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus and nuclear weapons;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible Investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*. These exclusion criteria can be modified at any time by the management company.

For some sub-funds, additional criteria relating to Responsible Investing may apply. These are further specified in 'Information concerning the sub-fund – 2. Investment information – Selected strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for Responsible Investment funds*.

For sub-funds that are passively managed and therefore replicate the composition of a financial index, the following applies:

Investments may not be made in financial instruments issued by manufacturers of controversial weapon systems that are prohibited by national law. These weapon systems include: cluster bombs and sub-munitions, anti-personnel mines (including Claymore mines), weapons containing depleted uranium (More information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*).

Integration of sustainability risk into the investment policy:

In the investment policy, the management company shall take into account the sustainability risk as defined in prospectus under title "F. Information on the risk profile of the UCITS" as follows:

- I. by defining an exclusion policy (the "Exclusion Criteria") applicable to all funds and Sicavs. (Further information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*); and
- II. additional criteria relating to Responsible Investing may apply for certain sub-funds. If applicable these additional criteria are specified under title '2. Investment information - Selected Strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for responsible investment funds*.

In its investment policy, the management company constantly assesses the underlying investments at issuer level, but also (if relevant) at the level of the asset allocation and the regional or sectoral allocation. In these regular assessments, the sustainability risk is considered as one of the various elements that can influence the return. The Responsible Investing research team assigns an ESG risk rating to the majority of companies included in the best-known benchmarks and to a selection of small and medium-sized companies, based on input from an ESG data provider, where ESG stands for "Environmental, Social and Governance". The ESG risk ratings are shared internally with portfolio managers and strategists so that they can use them as a factor in the investment decision-making process. Responsible Investing funds additionally have a target to improve the weighted average ESG risk rating (of companies) of the fund versus its asset allocation. More information on our Responsible Investing methodology can

be found in this policy document: www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

1.2.1.4. Summary risk indicator

In accordance with Commission Regulation (EU) No.1286/2014, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021, a summary risk indicator has been calculated per sub-fund, or where relevant per share class or type of shares. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The summary risk indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'What are the risks and what could I get in return?' heading in the 'Key Information' document.

1.2.1.5. Ongoing charges

The key investor information sets out the ongoing charges, as calculated in accordance with the provisions of Commission Regulation (EC) No. 583/2010 of 1 July 2010.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown in a single figure that represents all annual charges and other payments taken from the assets over the defined period and for a sub-fund and that is based on the figures for the preceding year. This figure is expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class.

The following are not included in the charges shown: entry and exit charges, performance fees, transaction costs paid when buying or selling assets, interest paid, payments made with a view to providing collateral in the context of derivative financial instruments, or commissions relating to Commission Sharing Agreements or similar fees received by the Management Company or any person associated with it.

1.2.1.6. Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In the information for each sub-fund – under '2.4.6. Expenses' – you can see the percentage of the fee that has actually been shared for each sub-fund.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee sharing heeft geen invloed op de hoogte van de beheercommissie die a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

1.2.1.7. Existence of Commission Sharing Agreements

For the following sub-funds exist Commission Sharing Agreements: Asia Pacific, Asia Pacific Responsible Investing, Belgium, CSOB Akciovy fond dividendovych firem, Emerging Europe, Emerging Markets, Emerging Markets Responsible Investing, EMU Small & Medium Caps, EMU Small & Medium Caps Responsible Investing, Enhanced Intelligence Stock Selection, Europe, Eurozone, Eurozone DBI-RDT, Eurozone Responsible Investing, Family Enterprises, Flanders, Fundamental Opportunities, Fundamental Opportunities DBI-RDT, Global Value Responsible Investing, High Dividend New Markets, Medical Technologies, Minimum Variance Responsible Investing, New Asia, New Shares, North America, North American Continent, North American Continent Responsible Investing, North America Responsible Investing, Quant EMU, Rest of Europe, Rest of Europe Responsible Investing, Satellites, Strategic Satellites, Trends, USA & Canada, USA & Canada Responsible Investing, We Care Responsible Investing, We Digitize Responsible Investing, We Like Responsible Investing, We Live Responsible Investing, We Shape Responsible Investing, World, World DBI-RDT, World DBI-RDT Responsible Investing, World Responsible Investing

For the following sub-funds don't exist Commission Sharing Agreements: US Small Caps

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed.

No CSA accrual during this period.

1.2.1.8. Recurrent fees and charges

Recurrent fees and charges paid by the Bevek	
Fees paid to directors insofar as the General Meeting has approved said fees.	250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed.

Recurrent fees and charges paid by the sub-fund	
Fee paid to the statutory auditor of the Bevek	Fee of the statutory auditor: 6150 EUR/year (excluding VAT) and: 980 EUR/year (excluding VAT) for non-structured sub-funds. These amounts can be indexed on an annual basis in accordance with the decision of the General Meeting.

1.2.1.9. Non-recurrent fees and charges borne by the investor

If, at a certain time, the Management Company detects exceptionally high net entries in or exits from a sub-fund, it may decide to impose an additional charge (anti-dilution levy) on the entering or exiting investors concerned, intended for the sub-fund and aimed at neutralising the negative impact on the net asset value caused by investors' entries or exits.

This anti-dilution levy will only be charged in very exceptional situations where, due to exceptional market conditions, the transaction charges resulting from the entries and exits of investors are so high that they would have too great a negative impact on the net asset value (and therefore on existing investors in that sub-fund). At that time, the amount of this anti-dilution levy will be determined by the Management Company in function of the transaction charges.

This anti-dilution levy can be applied in the following sub-funds: Asia Pacific, Asia Pacific Responsible Investing, Belgium, CSOB Akciovy fond dividendovych firem, Emerging Europe (In Liquidation), Emerging Markets, Emerging Markets Responsible Investing, EMU Small & Medium Caps, EMU Small & Medium Caps Responsible Investing, Enhanced Intelligence Stock Selection, Europe, Eurozone, Eurozone DBI-RDT, Eurozone Responsible Investing, Family Enterprises, Flanders, Fundamental Opportunities, Fundamental Opportunities DBI-RDT, Global Value Responsible Investing, High Dividend New Markets (In Liquidation), Medical Technologies, Minimum Variance Responsible Investing, New Asia, New Shares, North America, North America Responsible Investing, North

American Continent, North American Continent Responsible Investing, Quant EMU (In Liquidation), Rest of Europe, Rest of Europe Responsible Investing, Satellites (In Liquidation), Strategic Satellites, Trends, US Small Caps, USA & Canada, USA & Canada Responsible Investing, We Care Responsible Investing, We Digitize Responsible Investing, We Like Responsible Investing, We Live Responsible Investing, We Shape Responsible Investing, World, World DBI-RDT, World DBI-RDT Responsible Investing, World Responsible Investing.

1.2.2. General market overview

1 January 2024 – 30 June 2024

General overview

The economic context

The stock markets got off to a great start in 2023, and there was improvement in a number of economic indicators. Over the summer, however, we saw steadily deteriorating indicators. Initially, manufacturing showed some weakness, but the service sector then followed suit, too. This was mainly noticeable in Europe, where growth rates were also close to zero. Lower energy prices caused a sharp fall in headline inflation, but core inflation remained high, prompting central banks to keep raising interest rates. Oil prices rose steeply in the third quarter of 2023, reflecting fears that interest rates will remain high for a long time. Meanwhile, another armed conflict erupted in the Middle East. This increased upward pressure on oil and gas prices for a while. However, a further escalation has so far failed to materialise, and economic realities are once more prevailing.

Higher interest rates and weaker economic data ushered in a downturn on the equity and bond markets over the summer, which bottomed out in October. Central banks eventually paused the hikes in interest rates. This gave rise to renewed speculation that interest rates might fall faster after all, prompting a spectacular year-end rally on the markets. So far, there seems to be no end to this rally, which has been driven mainly by tech stocks. Although interest rates began to rise again in early 2024, equity markets were nevertheless able to continue their upward path, while bonds have been marking time since then.

The US economy is clearly outperforming the European economy. While the labour market remains strong, we have recently seen some signs of weakening. This weakening was noticeable in Europe sooner, allowing the ECB to be the first to cut rates.

Monetary policy

To win the fight against inflation, policymakers have been raising interest rates at breakneck speed since 2022. Where in the past, interest rates have been raised in small steps, this time the Fed in the US hiked interest rates several times in 0.75% increments. The persistently high core inflation prompted a steady series of sharp interest rate hikes. The monetary policy is currently taking a breather. Although the Fed says it is 'data-dependent', a first interest rate cut is expected in the autumn. At the end of the reporting period, the US key rate was unchanged at 5.5%.

In Europe, the ECB has also been forced to raise interest rates sharply to fight inflation, starting in 2022. Interest rates were raised for the first time in July 2022, by 50 basis points. In Europe, too, rates were systematically raised in 2022 and again in 2023. At the end of the reporting period, the European deposit rate stood at 3.75%, after the ECB – acting before the Fed – made its first rate cut in June 2024.

Japan saw a slight rate increase for the first time in a long time. Japanese inflation is still slightly above target. Consequently, the yen's exchange rate has often faced speculation in recent months, in anticipation of a possible change in interest rate policy. However, the interest rate policy adjustment did nothing to support the yen, which continues to perform poorly.

Currency markets

During the reporting period, the euro lost -2.95% of its value against the dollar. The euro rose by 3.65% against the Swiss franc and fell by -2.27% against sterling. The euro on the other hand gained 10.71% against the Japanese yen as the changes in Japan's rate policy were not as significant as expected.

Stock markets

1. Regions

Equity markets enjoyed a good rally in the spring of 2023, driven by the opportunities created by generative artificial intelligence. After falling sharply in the autumn, most indices ended the year on a positive note, and the upward trend continued unabated this year. Over the last six months, the global index has risen by 14.92% in euro terms.

Among traditional markets, US shares gained 18.36% in euro terms during the reporting period. In the second quarter of 2023, new developments around generative artificial intelligence captured investors' attention, and will continue to do so for some time. Investors eagerly hoovered up US shares. After an earlier period of sharp increases, long-term interest rates eased again at the end of the reporting period. This drove up prices of growth-oriented shares, chiefly in the US. Corporate earnings continue to support the US equity rally for now.

The euro area, where many economic data points are stuck at low levels, still gained 8.31% during the reporting period. Falling interest rates and the ensuing year-end rally also proved beneficial for European shares, and the positive sentiment continued in 2024. It wasn't until the end of the reporting period that European shares lost some of their shine, owing to tensions surrounding the early elections in France. Japan, helped by the low yen, also benefited, gaining 9.72% over the past six months.

The picture for shares from emerging markets (countries or regions that are expected to experience rapid economic growth to make up their lag with the West) is a mixed one at the present time. In China, investors are struggling with the challenging real estate sector. Increased concerns about local government debt also continue to worry investors. The lack of adequate stimulus measures by the Chinese government did nothing to help sentiment around Chinese shares. Some data points have since improved, and although the Chinese stock market recorded an increase of +8.22% over the reporting period, it is still trading well below its peak of several years ago.

Things are going better in India, where shares posted gains of no less than 20.69% over the past six months. After

ranking as one of the best-performing regions last year, Latin America has taken a tumble to the bottom of the list this year, recording a loss of -12.94%.

2. Broad sectors and industry groups

Although several sectors posted strong results throughout the reporting period, the rally was mainly driven by tech names, the 'Megacaps' in particular.

Cyclical stocks performed well, enabling the Materials sector to gain 1.69% over the past six months, for example. Industrials did much better, recording healthy gains of 10.42%.

Financials gained 17.79% over the past six months, as financial institutions benefited from the higher interest rates. The upward revision of the economic growth outlook is also good news, as it reduces the likelihood of defaults. Many economists seem to be taking a soft landing for the economy as the baseline scenario.

Over the past six months, Consumer Discretionary sectors rose by 7.54%. As positive as this result may be, consumers do seem to be slightly losing momentum.

Consumer Staples, which are typically defensive sectors, gained 5.61%. Their defensive character means they are sometimes seen by investors as an alternative to fixed-income assets. With higher yields on the latter asset class, Consumer Staples are now facing more competition and investors are therefore more inclined to choose bonds. Corporate earnings forecasts are however beginning to improve. Utilities, on the other hand, performed a little better (+8.34%).

By contrast, Health Care, another defensive sector, bucked the trend by posting a more positive result (+ 10.7%). A few players are attracting all the attention. Their diabetes medication also seems to be able to treat a variety of other ailments. The outlook isn't bad and the pipeline is well stocked with new products.

The IT and communications sectors (+28.63% and +24.09%, respectively) were dominated by a few very large companies, which were able to take full advantage of the hype created around artificial intelligence. For now, however, that hype is perpetuated by strong corporate results. They were accordingly among the best-performing sectors for this reporting period.

Projections

The economic context

Economic conditions remain uncertain. On the one hand, we could see some positive growth surprises in the US and we can gradually expect more rate cuts. Moreover, money is still flowing into the economy in response to several new fiscal policy measures, often linked to sustainable infrastructure. On the other hand, we are gradually seeing signs of continued weakness in the European economy, and the US service and manufacturing sectors are also starting to wane, which is creating an imbalance.

Despite steadily increasing interest rates and inflation figures not seen in 40 years, the economy has so far held up quite well, due in part to a very buoyant labour market and persistently strong consumer spending. The highest inflation levels are now obviously also behind us, and price rises are moving steadily towards 2%. 2024 is also an election year in many parts of the world. The decision to call for early parliamentary elections in France caught us by surprise. In a country where the fiscal situation isn't exactly great as it is, a political stalemate could lead to further challenges. The US presidential election this autumn could also lead to increased volatility. Neither candidate is particularly popular, and their participation is questioned for various reasons.

Corporate results continued to perform better than expected, especially in the US, driven mainly by demand for semiconductors and software enabling the development of new generative AI-based applications. Second-quarter figures will soon be out. While earnings growth is expected to average around 8% in the US, expectations are noticeably lower for Europe.

Bond markets also struggled to find a consistent direction for a while. However, the easing of interest rates during the last quarter of 2023 put bond markets into profit. However, with interest rates rising since the new year, the bond markets have since shed some of those gains. After a first rate cut by the ECB in June, more rate cuts are expected this autumn, including from the Fed. This should also support bond prices in the course of the year. In the meantime, we can enjoy an attractive current return. Tactical management of the bond portfolio's remaining term to maturity could provide welcome extra returns in the interim.

Because of the volatility of the interest rates, earnings figures that are not particularly broadly spread across sectors, and the expectation that economic growth will be somewhat less robust over the next few quarters, our investments are currently fairly balanced. We are accordingly neutrally positioned in both equities and bonds.

Monetary policy

The Fed and ECB have already raised interest rates very sharply. The market now seems to be betting on a first interest rate cut at the end of the second quarter of 2024. Given the weaker economic picture in Europe compared to the US, the ECB has already seized the opportunity to be the first to cut rates. At least one, possibly two more rate cuts are expected for both regions this year.

Currency markets

We are anticipating a fairly flat USD performance for the rest of the year. We are projecting a euro-US dollar exchange rate of around 1.09 by the end of 2024.

Financial markets

The risk of a deep recession seems off the table. The results from major technology companies propelled markets, but other sectors were not always able to match expectations. We are therefore now neutrally positioned in our share investments. We regularly make tactical switches to take advantage of the momentum.

Bond markets remain in the grip of interest rate movements, and have recently been particularly volatile as a result. The rapid fall in interest rates in the last two months of 2023 was followed by a sluggish rise in interest rates since early 2024. Bonds are still offering attractive current returns, which can provide a useful buffer in an investment portfolio. This is enabling bonds to resume their role as a safe haven. Again, we maintain a neutral stance, but take advantage of volatile interest rates to tactically shift the portfolio's remaining term to maturity.

As always, we are holding a limited cash position to respond to opportunities as they arise. Cash is currently also delivering a healthy net return.

Stock markets

The relatively strong US labour market is pushing up wages as well as boosting purchasing power for households. This means that the US central bank (Fed) will not be readily tempted to cut interest rates sharply, although there is talk of possible rate cuts later this year. Recent figures are showing the first signs of weakness, which should give the Fed more room to actually cut interest rates later this year. We are obviously also keeping a close eye on the US presidential election, which could lead to market volatility.

In the euro area, lower inflation and the weak figures in the manufacturing sector in particular prompted the ECB to make its first interest rate cut in June. The French elections and potential coalition formation challenges may still throw a spanner in the works. We are therefore maintaining a fairly defensive positioning in the equity strategy for the time being, but make regular tactical adjustments.

At regional level, the portfolio is relatively well balanced. We are maintaining a neutral stance on Emerging Asia and are more cautious on China. Within Asia, we are still positive towards the Pacific region, which consists mainly of Japanese companies. This region has decidedly defensive qualities and is benefiting from the recovery of the economy in Emerging Asia. The cheap yen is an advantage for Japanese exporting companies. The recent first interest rate hike in years did not significantly impact the level of the yen. Japan's policy remains very supportive.

In the major Western economic centres, our regional preference depends mainly on the sectors we choose. As a result, our current positioning in North America is slightly underweight. In the euro area, we are positioning ourselves positively, as we are in Europe ex-EMU. We are still holding positions in certain defensive sectors that have a strong presence in some European countries, and are also becoming more positive towards some of the more cyclical themes found in the euro area, such as the banking sector.

Within the EMU, we do favour small and medium-sized enterprises, and are building up our position further in these stocks.

At sector level, we are underweight in cyclical sectors, especially those linked to manufacturing. We are also invested below the benchmark weight in the Transport and Automotive sectors. We are however now neutrally invested in Materials, a change from our previously underweight position. The surge in the price of some commodities, the low valuation of the sector and a possible revival in demand from China could prompt a revaluation of the sector.

However, we are underweight in Consumer Discretionary sectors. After a strong rally, we are taking profits and looking for opportunities elsewhere.

We take a positive view of financial stocks, for both banks and insurers, both of which are benefiting from higher interest rates, and are not overvalued.

We are neutral on the strongly US-linked Technology sector, though with more pronounced positions in some subsectors. We are underweighting Hardware due to lower near-term growth prospects. The strong AI-related rally had made the semiconductor subsector much more expensive. However, rising interest rates put an end to that this summer, prompting us to step in again, at much better prices. This allowed us to further boost the position to overweight. Other subsectors such as software and media are currently somewhat neutral positions in our portfolio.

We are continuing to focus on defensive sectors. Health Care is a defensive sector that has an interesting pipeline. Moreover, new developments involving diabetes medication also look promising for other applications. We are overweight mainly in pharma companies, which are also no longer as expensive as they were a while ago. In addition, we are positive towards medical technology companies. Investments are rising again, and the inventory cycle is evolving positively.

We are also overweight in Consumer Staples. These companies, which include food and beverage producers as well as household and personal products manufacturers, provide stable income in uncertain times. We are overweighting food and beverage companies. We are taking a neutral stance on Utilities.

We are less positive on real estate, as the flare-up in interest rates is putting continued pressure on the valuation of property portfolios. We should however add the caveat that our less positive stance largely concerns US real estate, which faces a number of specific problems. In Europe, moreover, an interest rate cut is being considered, which should be good news for European real estate companies.

1.5. Summary of recognition and valuation rules

1.5.1. Summary of the rules

Summary of the valuation rules pursuant to the Royal Decree of 10 November 2006 on the accounting, annual accounts and periodic reports of certain open-ended undertakings for collective investment.

The assets of the various sub-funds are valued as follows:

- When purchased or sold, securities, money market instruments, units in undertakings for collective investment and financial derivatives are recorded in the accounts at their acquisition price or sale price, respectively. Any additional expenses, such as trading and delivery costs, are charged directly to the profit and loss account.
- After initial recognition, securities, money market instruments and financial derivatives are measured at fair value on the basis of the following rules:
 - Securities that are traded on an active market without the involvement of third-party financial institutions are measured at fair value using the closing price;
 - Assets that have an active market which functions through third -party financial institutions that guarantee continuous bid and ask prices are measured using the current bid price set on that market. However, since most international benchmarks use mid-prices, and the data providers cannot supply bid prices (e.g., JP Morgan, iBoxx, MSCI, etc.), the midprices are used to measure debt instruments, as provided for in the Notes to the aforementioned Royal Decree. The method to correct these midprices and generate the bid price is not used, as it is not reliable enough and could result in major fluctuations.
 - Securities whose last known price is not representative and securities that are not admitted to official listing or admitted to another organised market are valued as follows:
 - 1 When measuring these securities at fair value, use is made of the current fair value of similar assets for which there is an active market, provided this fair value is adjusted to take account of the differences between the assets concerned.
 - 2 If no fair value for similar assets exists, the fair value is calculated on the basis of other valuation techniques which make maximum use of market data, which are consistent with generally accepted economic methods and which are verified and tested on a regular basis.
 - 3 If no organised or unofficial market exists for the assets being valued, account is also taken of the uncertain character of these assets, based on the risk that the counterparties involved might not meet their obligations.
 - Shares for which there is no organised or unofficial market, and whose fair value cannot be calculated reliably as set out above, are measured at cost. Impairment is applied to these shares if there are objective instructions to this end.
 - Units in undertakings for collective investment (for which there is no organised market) are measured at fair value using their last net asset value.
- Liquid assets, including assets on demand at credit institutions, obligations on current account vis-à-vis credit institutions, amounts payable and receivable in the short term that are not represented by negotiable securities or money market instruments (other than vis-à-vis credit institutions), tax assets and liabilities, are measured at nominal value. Other amounts receivable in the longer term that are not represented by negotiable securities are measured at fair value. Impairment is applied to assets, amounts to be received and receivables if there is uncertainty that they will be paid in full or in part at maturity, or if the realisation value of this asset is less than its acquisition value. Additional impairment is recorded on the assets, amounts to be received and receivables referred to in the previous paragraph to ensure that any change in their value, or risks inherent in the asset in question, are taken into account.
- The income generated by securities lending is recognised as other income (Income statement II.B.a.: Investment income and expenses – Interest – Securities and money market instruments) and is included on an accruals basis in the income statement over the term of the transaction.
- Securities issued in a currency other than that of the relevant sub-fund are converted into the currency of the sub-fund at the last known mid-market exchange rate.

Differences

A minor difference may appear from time to time between the net asset value as published in the press and the net asset value shown in this report. These are minimal differences in the net asset value calculated that are identified after publication.

If these differences reach or exceed a certain tolerance limit, the difference will be compensated. For those buying or selling shares in the bevek and for the bevek itself, this tolerance limit will be a certain percentage of the net asset value and the net assets, respectively.

This tolerance limit is:

- money market funds: 0.25%
- bond funds, balanced funds and funds offering a capital guarantee: 0.50%
- equity funds: 1%
- other funds (real estate funds, etc.): 0.50%

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are, directly or indirectly, mainly invested in shares of companies from Japan and developed countries in the Asia Pacific region.

The fund is actively managed with reference to the following benchmark: MSCI Pacific-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to

be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of investments in the shares of companies from Japan and developed countries of the Asia Pacific Region
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of investments in the shares of companies from Japan and developed countries of the Asia Pacific Region
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund Asia Pacific (in Japanese yen)

	1 st half of year
Purchases	9,508,317,682.45
Sales	14,148,554,348.79
Total 1	23,656,872,031.24
Subscriptions	10,386,086,508.00
Redemptions	16,908,668,850.00
Total 2	27,294,755,358.00
Monthly average of total assets	145,853,103,830.88
Turnover rate	-2.49%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in JPY and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,739%

Transaction costs: 0,019%

Classic Shares Distribution :

Ongoing charges : 1,761%

Transaction costs: 0,019%

Institutional B Shares Capitalisation :

Ongoing charges : 0,467%

Transaction costs: 0,019%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,01% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 15.757.389,21 JPY and for the Management Company 6.302.955,69 JPY. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 44, with a market value fluctuating between 0 and 170541030.1 EUR.The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

Name	Currency	Quantity	Price	Value in currency of the portfolio

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	3,33	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	5.164.890.500,00	JPY
proportion of the collective investment undertaking's assets under management (AUM)	3,33	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Republic of Austria	4.422.098.216,40	JPY
Kingdom of Spain	849.198.733,52	JPY
French Republic	332.565.819,77	JPY

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	BARCLAYS CAPITAL SECURITIES LTD., LONDON	UK	0,00	JPY
equity (Goldman Sachs)	Goldman Sachs International	UK	0,00	JPY
equity (Goldman Sachs)	UBS AG	Switzerland	0,00	JPY
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	JPY

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from Japan and developed countries in the Asia-Pacific region.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a

better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Pacific-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Pacific-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI Pacific-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;

- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI Pacific-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Japanese Yen, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from Japan and the Asia Pacific Region.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from Japan and the Asia Pacific Region.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Japanese Yen, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from

Japan and the Asia Pacific Region.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund Asia Pacific Responsible Investing (in Japanese yen)

	1 st half of year
Purchases	12,719,579,199.29
Sales	11,294,782,065.18
Total 1	24,014,361,264.47
Subscriptions	13,254,218,592.10
Redemptions	13,453,038,309.22
Total 2	26,707,256,901.31
Monthly average of total assets	136,245,089,769.43
Turnover rate	-1.98%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

Classic Shares

BE6307772564

KBC Equity Fund Asia Pacific Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/07/2018 through 30/06/2024 (inJPY)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307772564	JPY	19.07%	23.57%	10.70%	14.44%					05/11/2018	

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in JPY and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 2,028%
Transaction costs: 0,024%

Institutional B Shares Capitalisation :

Ongoing charges : 0,663%
Transaction costs: 0,024%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.01%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 13.397.440,07 JPY and for the Management Company 5.358.976,03 JPY. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 31, with a market value fluctuating between 0 and 145426240.69451 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

Total				7 187 251 059,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	4,52	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	6.625.474.217,75	JPY
proportion of the collective investment undertaking's assets under management (AUM)	4,52	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Republic of Austria	5.340.322.972,16	JPY
Kingdom of Spain	1.219.121.933,94	JPY
Kingdom of the Netherlands	501.016.767,30	JPY
French Republic	126.789.385,91	JPY

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
Nil	Nil	Nil	Nil	Nil

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
FRENCH REPUBLIC GOVERNMENT 2.0 25NOV32	NR	EUR	above one year

2. Information on KBC Equity Fund Belgium

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date: 1 October 1991

Initial subscription price: 5 000 BEF

Currency: EUR

Distribution

Launch date: 1 October 1991

Initial subscription price: 5 000 BEF

Currency: EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of Belgian companies.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of the investments in shares of Belgian companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024
EURO	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund Belgium (in Euro)

	1 st half of year
Purchases	1,762,895.63
Sales	7,513,763.96
Total 1	9,276,659.59
Subscriptions	409,489.62
Redemptions	6,195,995.49
Total 2	6,605,485.11
Monthly average of total assets	83,876,346.90
Turnover rate	3.18%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
	Subscriptions		Redemptions		End of period

2.4.5. Performance figures

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0129009966	EUR	10.75%		2.41%		6.58%		7.52%		01/10/1991	2.89%
DIS	BE0129141348	EUR	10.73%		2.40%		6.57%		7.50%		01/10/1991	2.80%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Capitalisation :

Ongoing charges : 1,894%
Transaction costs: 0,027%

Distribution :

Ongoing charges : 1,902%
Transaction costs: 0,027%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 51,95% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 24.451,02 EUR and for the Management Company 9.780,41 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 5, with a market value fluctuating between 0 and 11165095 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

Name	Currency	Quantity	Price	Value in currency of the portfolio
AGEAS	EUR	11 200	42,68	478 016,00
AZELIS GROUP NV	EUR	76 000	16,76	1 273 760,00

SPAIN GOVERNMENT B 4.0 31OCT54 144A	EUR	905 000	EUR	927 112,00
FRANCE 1993 6,00% 25/10/2025	EUR	833 238	EUR	891 981,00
Total				2 838 026,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in

securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	3,10	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	2.573.526,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	3,08	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Kingdom of Spain	1.946.045,00	EUR
French Republic	891.981,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	BARCLAYS CAPITAL SECURITIES LTD., LONDON	UK	0,00	EUR
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	EUR
equity (Goldman Sachs)	Societe Generale International	France	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

KBC Equity Fund CSOB Akciovy Fond Dividendovych Firem aims to generate a return by investing at least 75% of its assets in shares with a high dividend yield. All regions, sectors and themes may be taken into consideration. The rest of the assets will be invested in bonds, debt instruments, money market instruments and deposits.

The sub-fund aims to hedge 100% of exchange rate risk to Czech koruna through forward contracts.

The fund is actively managed with reference to the following benchmark: MSCI World 100% Hedged to CZK - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

- 4 on a scale of 1 (lowest risk) to 7 (highest risk)
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund CSOB Akciovy fond dividendovych firem (in Czech koruna)

	1 st half of year
Purchases	1,495,204,281.89
Sales	1,346,687,682.44
Total 1	2,841,891,964.32
Subscriptions	330,244,896.80
Redemptions	161,191,946.30
Total 2	491,436,843.10
Monthly average of total assets	5,186,585,838.66
Turnover rate	45.32%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE6239644220

KBC Equity Fund CSOB Akciovy fond dividendovych firm CAP

Annual performance compared to the benchmark from 01/07/2014 through 30/06/2024 (inCZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

BE6239645235
 KBC Equity Fund CSOB Akciovy fond dividendovych firem DIS
 Annual performance compared to the benchmark from 01/07/2014 through 30/06/2024 (inCZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

There is insufficient data for this year to give investors a useful indication of past performance.

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6239644220	CZK	17.81%	24.41%	8.38%	8.55%	7.56%	11.84%	5.78%	10.13%	28/09/2012	7.73%
DIS	BE6239645235	CZK	17.81%	24.41%	8.39%	8.55%	7.56%	11.84%			28/09/2012	

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Capitalisation :

Ongoing charges : 1,651%
Transaction costs: 0,037%

Distribution :

Ongoing charges : 1,651%
Transaction costs: 0,037%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 70,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 212.854,40 CZK and for the Management Company 85.141,76 CZK. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 6, with a market value fluctuating between 0 and 9269139.7624445 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Details of collateral cash given for financial derivatives

Name	Currency	Value in currency of the portfolio
Given cash collateral	EUR	-2830000.00

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,61	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	33.162.659,17	CZK
proportion of the collective investment undertaking's assets under management (AUM)	0,61	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

The fund is actively managed with reference to the following benchmark: MSCI EMU SMALL CAP - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Taking stock of the first half of 2024, we can conclude that stock selection has been a major factor in stock market returns this year. The best performance during the reporting period has come from technology stocks, especially those linked to the AI revolution. The technology giants known as the 'Magnificent Seven' were primarily responsible for the bulk of the stock market gains.

This came about despite the generally mediocre economic figures. Interestingly, the gains by technology stocks this year in the period up to April have been made in an environment of rising interest rates.

The expectation six months ago was that central bank key rates would be quite a bit lower by now. However, markets backtracked on that expectation, due mainly to inflation proving more stubborn than previously thought. The Swiss central bank has proved to be the exception, making two interest rate cuts this year. However, inflation in Switzerland is relatively low, and the Swiss central bank is also wary of the Swiss franc rising too sharply.

The interest rate market has undergone a turnaround since May, however, with the US economy and labour market now showing clear signs of cooling. The ISM manufacturing index, the barometer of confidence among business leaders, fell by much more than expected in May and June. The increase in unemployment also surpassed expectations, rising to 4.1%, while job growth also appears to be slowing sharply. This could shift the focus back to a period of disinflation, in turn increasing the likelihood of interest rates being cut from September on.

This rapid fall in inflation will allow interest rates to come down, and the lower rates are, the more attractive shares become.

Small and medium-sized shares lagged behind the stock market indices again in 2024, for the third year in a row, due mainly to the absence of the 'Magnificent Seven' and the underrepresentation of technology. High-quality tech companies are seldom found amongst the small and mid-caps. The strong performance of the stock markets in 2024 has been driven mainly by investor hype around artificial intelligence (AI). This has given technology and semiconductor companies a boost. The stock market index for small and medium-sized enterprises is largely made up of more cyclical shares from industrial and consumer goods sectors. Nonetheless, we have capitalised on the AI theme by selecting a number of small and mid-caps that also benefit from this theme. In addition, small and medium-sized stocks are also more sensitive to interest rate movements. Consequently, rising interest rates in the period up to April this year have weighed on the performance of these stocks. Small-cap shares have been hit hard by high levels of inflation and increases in the cost of capital, as many small caps have less robust balance sheets, a larger portion of their debt has shorter maturities and their pricing power is weaker than that of larger companies.

2.1.8. Future policy

In Europe, small and medium-sized businesses represent more than two-thirds of the working population and more than half of economic added value. While in many respects, they can be seen as the lifeblood of the European economy, share prices of small and mid-cap companies (SMID) have nonetheless lagged significantly behind the broader market in the past three years. Trading in the European market in the first half of 2024 was again strongly concentrated in a small subset of large-cap stocks. Many of the factors that historically made the SMID universe such fertile ground for share selection apply more than ever today. Small and mid-cap funds have meanwhile lost assets under management in all regions, and 2024 was the third successive year of outflows. In the past two years, European and British SMID funds experienced the largest outflow since the global financial crisis in 2008. SMID caps are therefore currently an investment category with historically low levels of assets under management. As a result of the diminished interest, the number of stocks being followed is progressively decreasing and analysis, as a rule, is much less extensive than for the large-cap counterparts. For example, there are almost twice as many companies in Europe than in the USA that are followed by two or fewer sell-side analysts. Less coverage by sell-side analysts means there are more inefficiencies in the market to be profited from. This offers potential opportunities to active investors.

The Small & Midcap Index, which for a long time was trading at a premium relative to large caps owing to the superior growth profile, is currently in the unusual position of being traded at a discount on a series of financial measures, including price/earnings ratio (P/E), price-to-book value, price-to-sales and price-to-cash flow.

Now that the spectre of inflation may have been finally warded off and further interest-rate cuts are in the pipeline following the ECB's first cut, it is time for European small and mid-caps to play catch-up. In a historical perspective, for very long periods in the past, European small and mid-cap shares yielded 3 to 4% per year more than large caps. All the reasons that justified the premium for small caps in the past, such as the higher growth potential, continue to exist. We believe that the decline of small and mid-caps is an overreaction to short-term factors and an example of short-term pessimism obscuring promising long-term opportunities. We remain convinced that there are great companies and many good business models in the small and mid-cap world.

There is a larger number of family businesses in the small and mid-cap universe and many businesses are characterised by a long-term mentality, high quality, and sound decisions in terms of capital allocation.

Lower rates also make it cheaper to borrow money to finance acquisitions. Holders of small and mid-cap shares therefore stand to benefit from corporate takeovers that generate share price premiums. We also note that the low valuations have not gone unnoticed by private equity firms. The sector is increasingly focusing on listed companies. The reason is evident: after many years of sub-par performance, valuations of small caps are historically low and can therefore be attractive targets for private equity investors, despite the takeover premium.

As for the sectors, we are maintaining our overweight position in European banks, as we believe that despite their strong performance their valuation is still very attractive. In addition, we believe that the analysts are overly conservative in their earnings estimates that already anticipate lower earnings due to the decreasing interest rates, whereas we expect earnings to remain at least stable. In our view, the high dividend yields will also put a floor under the sector. At the same time, we will continue to focus on the technology sector, and especially the semiconductor sector.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a

smaller market capitalisation.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund EMU Small & Medium Caps (in Euro)

	1 st half of year
Purchases	196,901.04
Sales	27,259,737.60
Total 1	27,456,638.64
Subscriptions	7,002,291.30
Redemptions	34,509,251.14
Total 2	41,511,542.44
Monthly average of total assets	169,381,429.52
Turnover rate	-8.30%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Transaction costs: 0,010%

Institutional B Shares Capitalisation :

Ongoing charges : 0,500%
Transaction costs: 0,010%

Corporate Wealth Office shares Capitalisation :

Ongoing charges : 1,330%
Transaction costs: 0,010%

Corporate Wealth Office shares Distribution :

Ongoing charges : 1,329%
Transaction costs: 0,010%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,20% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 3.682,06 EUR and for the Management Company 1.472,82 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 5, with a market value fluctuating between 0 and 3780560 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio

DEUTSCHE BUNDESREPUB 0.5 15APR30 IL	EUR	1 592 248	EUR	2 011 286,00
UNITED KINGDOM GILT 4.0 22OCT63	GBP	1 158 438	EUR	1 242 711,00

Total

3 706 539,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	1,82	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	2.713.340,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	1,81	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Federal Republic of Germany	2.011.286,00	EUR
United Kingdom of Great Britain	1.242.711,00	EUR
Republic of Austria	452.542,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	BARCLAYS CAPITAL SECURITIES LTD., LONDON	UK	0,00	EUR
equity (Goldman Sachs)	Citigroup Global Markets Limited	UK	0,00	EUR
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
DEUTSCHE BUNDESREPUB 0.5 15APR30 IL	NR	EUR	above one year
REPUBLIC OF AUSTRI 0.0 20OCT40 144A	NR	EUR	above one year
UNITED KINGDOM GILT 4.0 22OCT63	NR	EUR	above one year

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
1	Bank of New York	3.706.539,00	EUR

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil
--	-----

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return EUR	5.664,71	1.472,82	509,82
percentage of overall returns	100,00 %	26,00%	9,00%
cost EUR	1.982,65		
percentage of overall returns	35,00 %

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI EMU SMALL CAP - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI EMU SMALL CAP - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI EMU SMALL CAP - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
Corporate events, such as a merger of one company with another, where the merged company can no longer be

- considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI EMU SMALL CAP - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024
EURO	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund EMU Small & Medium Caps Responsible Investing (in Euro)

	1 st half of year
Purchases	26,982,079.28
Sales	6,220,886.16
Total 1	33,202,965.44
Subscriptions	27,654,700.63
Redemptions	9,477,991.07
Total 2	37,132,691.70
Monthly average of total assets	113,271,981.90
Turnover rate	-3.47%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets

(excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C₀ * ... * C_N.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Institutional B Shares Capitalisation :

Ongoing charges : 0,534%
Transaction costs: 0,123%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those

		assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in European countries where conditions are such as to ensure accelerated economic growth in the short or medium term (so-called Emerging Markets).

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets Europe - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The long-term expected tracking error for this fund is 6.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

2.4.5. Performance figures

Not applicable.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Not applicable

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the **sub-fund's shares** by using multiple distribution channels. It is in the interests of the **holders of shares of a sub-fund** and of the distributor for the largest possible **number of shares** to be sold and for the assets of **a sub-fund** to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 0,00 EUR and for the Management Company 0,00 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in countries where conditions are such as to allow an accelerated economic growth in the short or medium term. More particularly, this involves countries in Asia, Latin America, Central Europe and Eastern Europe.

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from Asian, Latin-American and Central and Eastern European countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from Asian, Latin-American and Central and Eastern European countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of concentration risk: there is a concentration of the investments in shares of companies from Asian, Latin-American and Central and Eastern European countries.
 - a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund Emerging Markets (in Euro)

	1 st half of year
Purchases	487,394,931.48
Sales	495,019,189.57
Total 1	982,414,121.05
Subscriptions	80,494,925.33
Redemptions	87,774,264.87
Total 2	168,269,190.20
Monthly average of total assets	868,253,848.85
Turnover rate	93.77%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,808%
Transaction costs: 0,282%

Classic Shares Distribution :

Ongoing charges : 1,825%
Transaction costs: 0,282%

Institutional B Shares Capitalisation :

Ongoing charges : 0,456%
Transaction costs: 0,282%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,738%
Transaction costs: 0,282%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 57,31% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 4.230,30 EUR and for the Management Company 1.692,12 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 2056593.4 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
VODACOM GROUP LTD	ZAR	123 000	97,51	612 858,05

Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
SPAIN GOVERNMENT BOND 0.0 31JAN26	EUR	74	EUR	70,00
SPAIN GOVERNMENT B 1.0 30JUL42 144A	EUR	1 000	EUR	651,00
SPAIN GOVERNMENT B 3.9 30JUL39 144A	EUR	8 000	EUR	8 443,00
SPAIN GOVERNMENT 3.45 31OCT34 144A	EUR	601 000	EUR	616 273,00
UK 2007 VAR 22/11/47	GBP	128	EUR	247,00
Total				625 684,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,07	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	612.858,20	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,06	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 90% of the assets will be invested, directly or indirectly, in shares of emerging market companies.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Emerging Markets-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Emerging Markets-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI Emerging Markets-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

The investments of KBC Equity Fund Emerging Europe and KBC Equity Fund Emerging Markets include positions in shares listed on the Moscow stock exchange. Given the particular situation and the sanctions policy, these positions are valued at 0.01 RUB /share; the impact on the NAV can roughly be estimated at 0,010% and 246,81% respectively.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Emerging Markets Responsible Investing (in Euro)

	1st half of year
Purchases	191,924,450.38
Sales	199,206,611.53
Total 1	391,131,061.91
Subscriptions	116,255,655.29
Redemptions	91,094,172.47
Total 2	207,349,827.76
Monthly average of total assets	1,105,128,720.96
Turnover rate	16.63%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,607%
Transaction costs: 0,133%

Classic Shares Distribution :

Ongoing charges : 1,629%
Transaction costs: 0,133%

Corporate Shares Capitalisation :

Ongoing charges : 0,773%
Transaction costs: 0,133%

Institutional Shares Capitalisation :

Ongoing charges : 0,659%
Transaction costs: 0,133%

Institutional B Shares Capitalisation :

Ongoing charges : 0,462%
Transaction costs: 0,133%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,25% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.70%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those

		assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Corporate Shares

Fee for managing the investment portfolio	Max 0.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.

and any marketing costs

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in shares and/or share-related investments that may come from any region, sector or theme.

The sub-fund's stock selection is based on quantitative criteria using publicly available information including, but not limited to, companies' accounting, stock market and technical data such as price trends and volatility..., In addition, sentiment data may also be used.

Sentiment data can include data that expresses market participants' views about a particular company through research papers and third-party data providers, among others.

These criteria are incorporated into a specific model designed by KBC Asset Management that applies advanced quantitative techniques, including "machine learning" tools, to analyze a long and broad history of stock-level data. "Machine learning" is an application of artificial intelligence in which algorithms and statistical models are used by computer systems to learn to perform specific tasks without explicit instructions and solve problems that cannot be precisely specified, requiring logical reasoning ability.

The basic assumption of this model is that share prices are not always an accurate reflection of the fundamental value of the company in question, but that this fundamental value can be estimated provided one has sufficient information and can process this information efficiently.

It is also assumed that share prices will evolve towards fundamental value over time. However, the way in which this happens depends on the prevailing cycle in the market structure and its impact on the criteria included in the model. The quantitative model created by KBC Asset Management estimates a relative rating per share on a regular basis, evaluating shares in the investment universe relative to each other.

Better-rated shares are assigned a relatively heavier weight in the sub-fund's portfolio relative to their weight in the sub-fund's benchmark, while lower-rated shares are assigned a relatively lighter weight relative to their weight in the benchmark.

Appropriate diversification is ensured in accordance with relevant legal and risk restrictions.

However, the fund manager may decide at any time not to follow the models or to follow them only partially.

Human intervention is expected to occur rather in exceptional circumstances.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies

other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Enhanced Intelligence Stock Selection (in Euro)

	1 st half of year
Purchases	85,805,252.27
Sales	83,126,789.75
Total 1	168,932,042.01
Subscriptions	8,069,240.74
Redemptions	4,176,867.07
Total 2	12,246,107.81
Monthly average of total assets	114,306,347.92
Turnover rate	137.07%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,782%
Transaction costs: 0,184%

Classic Shares Distribution :

Ongoing charges : 1,792%
Transaction costs: 0,184%

Corporate Wealth Office shares Capitalisation :

Ongoing charges : 1,344%
Transaction costs: 0,184%

Corporate Wealth Office shares Distribution :

Ongoing charges : 1,343%
Transaction costs: 0,184%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,32% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Corporate Wealth Office shares

Fee for managing the investment portfolio	Max 1.05%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.
--	-------	---

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 1.019,56 EUR and for the Management Company 407,83 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 2258430.23 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	0,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	Nil	%

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of European companies.

The fund is actively managed with reference to the following benchmark: MSCI Europe Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy,

completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund is and has been invested in a selection of equities from the European region. The "Europe" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in European equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund Europe (in Euro)

	1 st half of year
Purchases	40,201,477.24
Sales	44,802,609.83
Total 1	85,004,087.06
Subscriptions	3,560,029.27
Redemptions	8,099,770.78
Total 2	11,659,800.04
Monthly average of total assets	70,532,009.44
Turnover rate	103.99%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

$$\frac{[NIW(D) / NIW(S)]^{1/F} - 1}{1}$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,719%
Transaction costs: 0,241%

Classic Shares Distribution :

Ongoing charges : 1,730%
Transaction costs: 0,241%

Institutional B Shares Capitalisation :

Ongoing charges : 0,451%
Transaction costs: 0,241%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,647%
Transaction costs: 0,241%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 58,92% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 7.277,19 EUR and for the Management Company 2.910,87 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 4284221.17 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	0,00	EUR

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of euro-area companies.

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy,

completeness, merchantability or fitness for a particular purpose with respect to any of such data. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024
EURO	100.00	99.87	99.79	98.57

TOTAL	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund Eurozone (in Euro)

	1st half of year
Purchases	569,130,285.14
Sales	536,342,784.16
Total 1	1,105,473,069.30
Subscriptions	135,075,181.23
Redemptions	123,721,384.98
Total 2	258,796,566.21
Monthly average of total assets	814,314,968.01
Turnover rate	103.97%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Classic Shares

Period	Change in number of shares in circulation						
	Subscriptions		Redemptions		End of period

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,689%

Transaction costs: 0,249%

Classic Shares Distribution :

Ongoing charges : 1,726%

Transaction costs: 0,249%

Institutional B Shares Capitalisation :

Ongoing charges : 0,452%

Transaction costs: 0,249%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 54,32% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 27.407,37 EUR and for the Management Company 10.962,95 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 7, with a market value fluctuating between 0 and 20917968 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,66	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	5.520.956,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,66	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Kingdom of Belgium	2.706.172,00	EUR
French Republic	1.719.091,00	EUR
Kingdom of Spain	1.673.877,00	EUR
United Kingdom of Great Britain	383.300,00	EUR
Federal Republic of Germany	0,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations. The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

At least 95% of the assets are invested in the shares of companies from the euro area.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund is and has been invested in a selection of equities from the Eurozone. The "Emu" part of the KBC AM strategy is followed. DBI requirements are taken into account as well.

2.1.8. Future policy

In the future, the fund will continue to invest in Eurozone equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Corporate Wealth shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund Eurozone DBI-RDT (in Euro)

	1 st half of year
Purchases	37,012,606.95
Sales	42,317,628.42
Total 1	79,330,235.37
Subscriptions	9,819,253.11
Redemptions	9,855,922.73
Total 2	19,675,175.84
Monthly average of total assets	99,492,510.64
Turnover rate	59.96%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives

positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

BE6299576080

KBC Equity Fund Eurozone DBI-RDT Classic Shares DIS

Annual performance compared to the benchmark from 01/07/2018 through 30/06/2024 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6299576080	EUR	10.04%	11.61%	4.22%	6.07%	7.04%	7.95%			02/01/2018	4.40%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Institutional Shares

BE6299843811

Institutional Shares Distribution :

Ongoing charges : 0,558%
Transaction costs: 0,155%

Corporate Shares Distribution :

Ongoing charges : 1,433%
Transaction costs: 0,155%

Corporate Wealth shares Distribution :

Ongoing charges : 1,155%
Transaction costs: 0,155%

Discretionary Shares Distribution :

Ongoing charges : 1,008%
Transaction costs: 0,155%

Institutional Discretionary Shares Distribution :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those

		assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies in the euro area.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the

objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI EMU-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI EMU-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI EMU-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;

- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Eurozone Responsible Investing (in Euro)

	1 st half of year
Purchases	603,161,410.03
Sales	644,149,413.11
Total 1	1,247,310,823.13
Subscriptions	142,520,966.73
Redemptions	201,948,775.29
Total 2	344,469,742.02
Monthly average of total assets	875,889,979.80
Turnover rate	103.08%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

BE6307731156

KBC Equity Fund Eurozone Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/07/2018 through 30/06/2024 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307731156	EUR	14.61%	11.61%	1.97%	6.07%					05/11/2018	1.52%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,702%
Transaction costs: 0,220%

Institutional B Shares Capitalisation :

Ongoing charges : 0,454%
Transaction costs: 0,220%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 46.482,62 EUR and for the Management Company 18.593,05 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 31348240 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
GRIFOLS SA	EUR	558 000	7,86	4 385 880,00
Total				4 385 880,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
SPAIN GOVERNMENT B 4.0 31OCT54 144A	EUR	479 000	EUR	490 704,00
SPAIN GOVERNMENT 3.45 31OCT34 144A	EUR	4 696 000	EUR	4 815 337,00
Total				5 306 041,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,52	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	4.385.880,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,51	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Kingdom of Spain	5.306.041,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
Nil	Nil	Nil	Nil	Nil

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares of listed family enterprises in Europe and North America.

To be considered as a family enterprise, the following conditions must be met:

- one family owns, directly or indirectly (e.g. through a company or foundation), the highest number of shares (percentage of interest) in the company and;
- one or more members of this family sit on the company's board of directors, directly or indirectly (e.g. through a company or by formal mandate from a third party).

Companies with strong family roots focus on the long term. Family enterprise shareholders want to transfer their company to the next generation so it is in their own interest to ensure that their company does well. They pursue growth responsibly and generally take less risk. They are highly involved in the company, both financially and emotionally, and are, therefore, more willing to invest capital in the company in the long term. This enables them to draw up a long - term strategy and implement it in practice, too.

(*) In the case of indirect shareholding, the percentage interest is calculated by multiplying the successive percentage interest.

For example:

Family X owns 60% of the shares of Company A, which in turn owns 50% of the shares of Company B. Consequently, Family X's percentage of interest in company B is 30%.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas

intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Wealth Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Total 2	15,619,372.43
Monthly average of total assets	211,212,220.47
Turnover rate	15.57%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Discretionary Wealth Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,06% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those

		assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 8.071,84 EUR and for the Management Company 3.228,74 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 5, with a market value fluctuating between 0 and 2894161.43 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
LOTUS BAKERIES	EUR	50	9 630,00	481 500,00

UNITED KINGDOM GILT 4.5 07JUN28	GBP	574	EUR	688,00
Total				1 783 963,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,68	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	1.440.096,61	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,68	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
French Republic	1.026.211,00	EUR
Republic of Austria	757.064,00	EUR
United Kingdom of Great Britai	688,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	Citigroup Global Markets Limited	UK	0,00	EUR
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares with a Flemish character where conditions are such as to allow accelerated economic growth in the short or medium term.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Taking stock of the first half of 2024, we can conclude that stock selection has been a major factor in stock market returns this year. The best performance during the reporting period has come from technology stocks, especially those linked to the AI revolution. The technology giants known as the 'Magnificent Seven' were primarily responsible for the bulk of the stock market gains.

This came about despite the generally mediocre economic figures. Interestingly, the gains by technology stocks this year in the period up to April have been made in an environment of rising interest rates.

The expectation six months ago was that central bank key rates would be quite a bit lower by now. However, markets backtracked on that expectation, due mainly to inflation proving more stubborn than previously thought. The Swiss central bank has proved to be the exception, making two interest rate cuts this year. However, inflation in Switzerland is relatively low, and the Swiss central bank is also wary of the Swiss franc rising too sharply.

The interest rate market has undergone a turnaround since May, however, with the US economy and labour market now showing clear signs of cooling. The ISM manufacturing index, the barometer of confidence among business leaders, fell by much more than expected in May and June. The increase in unemployment also surpassed expectations, rising to 4.1%, while job growth also appears to be slowing sharply. This could shift the focus back to a period of disinflation, in turn increasing the likelihood of interest rates being cut from September on. This rapid fall in inflation will allow interest rates to come down, and the lower rates are, the more attractive shares become.

By contrast, the annual return for the Belgian stock market index (+7%) again lagged well behind the US indices (S&P500: +19% and NASDAQ: +21%) and the European benchmarks (STOXX50: +19%). As already mentioned, the Belgian market is thin on the ground when it comes to technology shares. The fund benefited from a strong selection during the first six months, offset by weaker allocation. Some of the best performers were UCB, DEME, Recticel and Lotus Bakeries. Moreover, we significantly increased our position in Argenx following the FDA's approval of Vyvgart Hytrulo for the treatment of CIDP.

2.1.8. Future policy

We are looking forward to the publication of the half-year results and, more specifically, to the outlook for the companies in the portfolio. We remain vigilant towards any changes in business fundamentals (including growth, margins, cash generation and balance sheet structure) and how the market perceives them.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of the investments in shares of Flemish companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of the investments in shares of Flemish companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

Consumer Discretionary Products	1.77
Telecommunications	1.50
Software & Tech Services	1.10
Utilities	1.00
TOTAL	100.00

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024
EURO	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund Flanders (in Euro)

	1 st half of year
Purchases	1,057,780.02
Sales	7,435,393.17
Total 1	8,493,173.19
Subscriptions	1,294,652.26
Redemptions	7,371,027.61
Total 2	8,665,679.87
Monthly average of total assets	49,137,647.06
Turnover rate	-0.35%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Institutional Discretionary Shares

The cumulative returns are shown where they relate to a period of at least one year.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,884%

Transaction costs: 0,013%

Classic Shares Distribution :

Ongoing charges : 1,890%

Transaction costs: 0,013%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable

Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,82% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional Discretionary Shares

Fee for managing the investment portfolio	0.00%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Administration fee	0.02%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 9.465,44 EUR and for the Management Company 3.786,18 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 5169010 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
AGEAS	EUR	5 600	42,68	239 008,00
AZELIS GROUP NV	EUR	50 000	16,76	838 000,00

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in shares of companies which, according to the manager, fit within the theme of 'structural growth'. The manager therefore mainly selects shares of companies with relatively high turnover growth, rising profit margins, high returns on investment capital or high free cash flows. It invests in a worldwide selection of shares.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

Not applicable.

2.1.7. Policy pursued during the financial year

Last year, higher interest rates and some weaker economic data ushered in a downturn on the equity and bond markets over the summer, which bottomed out in October. Central banks eventually paused the hikes in interest rates, thereby pushing up equity markets. Although interest rates began to rise again in 2024, equity markets made up ground and ended on a positive note. The US economy appeared to clearly outperform the European economy and fears of a hard landing were pushed aside in the first half of the year. While the labour market remained strong, we still saw signs of weakening as the first half of the year progressed. This weakening was noticeable in Europe sooner, allowing the ECB to be the first to cut rates.

Although several sectors were able to post strong results this year, the rally was mainly driven by tech names. In addition to the megacaps, it was mostly the semiconductors that showed solid performance. We had increased these positions since the start of the year by buying Broadcom and Micron Technology. But it wasn't all good news on the tech front. We are overweighted in the software sector, but the software companies underperformed. Although these companies could still boast the development of AI applications last year, the market was slightly more sceptical this time around. It is clear that it will take time to monetise these applications, which may take longer than the market initially expected. In contrast with the megacap and semiconductor rallies, software companies hovered around zero.

The food sector, in which we had reduced our position since the start of the year, posted disappointing results in the first half of the year as well. Over the past few years, these companies successfully passed on high inflation by raising their prices without losing much of their volumes. We expected that this year might become more challenging, and our fears proved valid. Companies such as Nestlé, P&G and Mondelez struggled to grow their turnover. Customers turned away from these companies and started searching for cheaper alternatives in the supermarkets. These companies are known to have pricing power, but there's a limit to everything.

High unemployment among young people in China and the real estate crisis, which is still fresh in everyone's minds, also led Chinese consumers to watch their spending. This impacted the luxury sector and LVMH in particular. The most recent results show weak turnover growth of 1%, slightly below analysts' expectations. Only Hermès showed its excellence and grew by around 13% in the first half of the year, although it was slightly more cautious about its future prospects.

At the end of the first half of the year, France – and more specifically Macron – surprised everyone by announcing new elections after his party's disappointing results in the European elections. The market did not see this coming and started selling French stocks en masse out of fear that extreme right-wing parties might win the day. This also put more pressure on the European equity market.

It is clear that the high US interest rates are starting to weigh on consumers and on the global economy in general. The big question is not whether, but when, the US central bank will start lowering interest rates.

2.1.8. Future policy

We expect the second half of the year to be volatile, with anticipated interest rate cuts and the upcoming US elections. History has shown that the stock exchange is hardly affected by a victory of either the Democrats or the Republicans, but we may see more volatility than expected in the first few weeks.

If we look at the underlying portfolio, consensus figures nevertheless reveal positive earnings growth rates for the portfolio. Projected earnings growth was around 12 to 13% early this year, rising to more than 19% during this year.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth & Institutional Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional F Shares LU: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Wealth Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund Fundamental Opportunities (in Euro)

	1 st half of year
Purchases	47,431,853.01
Sales	35,531,601.49
Total 1	82,963,454.50
Subscriptions	68,156,384.42
Redemptions	47,847,075.20
Total 2	116,003,459.62
Monthly average of total assets	589,159,734.51
Turnover rate	-5.61%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

There is insufficient data for this year to give investors a useful indication of past performance.

Classic Shares

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6322323575	EUR	13.17%		3.55%						24/09/2020	7.25%
DIS	BE6322325596	EUR	13.17%		3.57%						24/09/2020	8.39%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C₀ * ... * C_N.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Discretionary Wealth Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 3.928,83 EUR and for the Management Company 1.571,53 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 11059569.58 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

The sub-fund invests primarily in shares of companies that, according to the fund manager, fit within the theme of 'structural growth'. The fund manager therefore mainly selects shares of companies with relatively high turnover growth, rising profit margins, high returns on investment capital or high free cash flows. Investments are made in a worldwide selection of shares. The sub-fund invests at least 50% of its assets in shares of which the dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% in shares of which the dividends and capital gains qualify for the DRD system.

This means that not all of the share portfolio may be invested in shares of which the capital gains and dividends qualify for the DRD system. As a result, it is conceivable that the income distributed to the shareholders by the sub-fund may not qualify in full for the dividends received deduction.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as

described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Last year, higher interest rates and some weaker economic data ushered in a downturn on the equity and bond markets over the summer, which bottomed out in October. Central banks eventually paused the hikes in interest rates, thereby pushing up equity markets. Although interest rates began to rise again in 2024, equity markets made up ground and ended on a positive note. The US economy appeared to clearly outperform the European economy and fears of a hard landing were pushed aside in the first half of the year. While the labour market remained strong, we still saw signs of weakening as the first half of the year progressed. This weakening was noticeable in Europe sooner, allowing the ECB to be the first to cut rates.

Although several sectors were able to post strong results this year, the rally was mainly driven by tech names. In addition to the megacaps, it was mostly the semiconductors that showed solid performance. We had increased these positions since the start of the year by buying Broadcom and Micron Technology. But it wasn't all good news on the tech front. We are overweighted in the software sector, but the software companies underperformed. Although these companies could still boast the development of AI applications last year, the market was slightly more sceptical this time around. It is clear that it will take time to monetise these applications, which may take longer than the market initially expected. In contrast with the megacap and semiconductor rallies, software companies hovered around zero.

The food sector, in which we had reduced our position since the start of the year, posted disappointing results in the first half of the year as well. Over the past few years, these companies successfully passed on high inflation by raising their prices without losing much of their volumes. We expected that this year might become more challenging, and our fears proved valid. Companies such as Nestlé, P&G and Mondelez struggled to grow their turnover. Customers turned away from these companies and started searching for cheaper alternatives in the supermarkets. These companies are known to have pricing power, but there's a limit to everything.

High unemployment among young people in China and the real estate crisis, which is still fresh in everyone's minds, also led Chinese consumers to watch their spending. This impacted the luxury sector and LVMH in particular. The most recent results show weak turnover growth of 1%, slightly below analysts' expectations. Only Hermès showed its excellence and grew by around 13% in the first half of the year, although it was slightly more cautious about its future prospects.

At the end of the first half of the year, France – and more specifically Macron – surprised everyone by announcing new elections after his party's disappointing results in the European elections. The market did not see this coming and started selling French stocks en masse out of fear that extreme right-wing parties might win the day. This also put more pressure on the European equity market.

It is clear that the high US interest rates are starting to weigh on consumers and on the global economy in general. The big question is not whether, but when, the US central bank will start lowering interest rates.

2.1.8. Future policy

We expect the second half of the year to be volatile, with anticipated interest rate cuts and the upcoming US elections. History has shown that the stock exchange is hardly affected by a victory of either the Democrats or the Republicans, but we may see more volatility than expected in the first few weeks.

If we look at the underlying portfolio, consensus figures nevertheless reveal positive earnings growth rates for the portfolio. Projected earnings growth was around 12 to 13% early this year, rising to more than 19% during this year.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free

cash flow.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund Fundamental Opportunities DBI-RDT (in Euro)

	1 st half of year
Purchases	26,650,807.53
Sales	21,177,507.12
Total 1	47,828,314.64
Subscriptions	33,888,543.52
Redemptions	30,072,307.86
Total 2	63,960,851.38
Monthly average of total assets	247,435,863.87
Turnover rate	-6.52%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

BE6326280375
KBC Equity Fund Fundamental Opportunities DBI-RDT Classic Shares DIS
Annual performance from 01/07/2021 through 30/06/2024 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6326280375	EUR	13.31%		3.55%						29/03/2021	6.41%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Distribution :

Ongoing charges : 1,784%
Transaction costs: 0,017%

Corporate Shares Distribution :

Ongoing charges : 1,425%
Transaction costs: 0,017%

Institutional Discretionary Shares Distribution :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.
--	-------	---

Corporate Shares

Fee for managing the investment portfolio	Max 1.15%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The objective is to generate a high return with as little fluctuations as possible in the value of the sub-fund. To this end, the assets are invested either directly, or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in collective investment undertakings, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable laws and regulations and consistent with the object specified above.

The sub-fund will invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled

by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World - Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark: MSCI World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Invest in equities in line with the fund's mandate as outlined in the prospectus. Invest in companies that are attractive/cheap based on a number of valuation criteria.

2.1.8. Future policy

Invest in equities in line with the fund's mandate as outlined in the prospectus. Invest in companies that are attractive/cheap based on a number of valuation criteria.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares USD: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Wealth Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund Global Value Responsible Investing (in Euro)

	1st half of year
Purchases	110,143,157.03
Sales	120,648,062.09
Total 1	230,791,219.11
Subscriptions	37,006,720.71
Redemptions	42,819,565.42
Total 2	79,826,286.12
Monthly average of total assets	817,907,574.19
Turnover rate	18.46%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

* These performances were achieved under circumstances that no longer apply

Classic Shares

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6338505405	EUR	13.02%								17/02/2023	7.13%
DIS	BE6338506411	EUR	13.01%								17/02/2023	7.10%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C₀ * ... * C_N.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

* Return on annual basis.

Institutional Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{1 / X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{1 / F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Classic Shares USD

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,60% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares with a high dividend yield of companies in countries where conditions are such as to ensure accelerated economic growth in the short or medium term, more specifically countries in Asia, Latin America, Central Europe and Eastern Europe.

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Transparency of adverse sustainability impacts:

Required disclaimers for benchmark providers:

Source: MSCI. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Not applicable

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the **sub-fund's shares** by using multiple distribution channels. It is in the interests of the **holders of shares of a sub-fund** and of the distributor for the largest possible **number of shares** to be sold and for the assets of **a sub-fund** to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in the medical sector, the preference being companies whose core business is developing and manufacturing medical equipment, where conditions are such as to allow an accelerated economic growth in the short and medium term.

The fund is actively managed with reference to the following benchmark: MSCI AC World Health Care Equipment and Services - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies operating in the medical sector.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies operating in the medical sector.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund Medical Technologies (in American dollar)

	1 st half of year
Purchases	37,803,078.40
Sales	58,698,398.55
Total 1	96,501,476.95
Subscriptions	9,549,855.34
Redemptions	23,025,885.68
Total 2	32,575,741.02
Monthly average of total assets	366,575,242.58
Turnover rate	17.44%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,755%

Transaction costs: 0,032%

Classic Shares Distribution :

Ongoing charges : 1,769%

Transaction costs: 0,032%

Institutional B Shares Capitalisation :

Ongoing charges : 0,489%

Transaction costs: 0,032%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 54,32% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 894,57 USD and for the Management Company 357,83 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 1, with a market value fluctuating between 0 and 7733122.484 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The aim is to generate a high return and minimise volatility in the sub-fund's value. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested directly or indirectly in a diversified selection of global shares .

The objective is to generate a high return while minimising the fluctuations in the value of the sub-fund. The composition of the portfolio is based on a quantitative model aimed at minimising expected volatility.

The main parameters of the model are historical data on the price movements of individual stocks, their correlation with the broad market and their mutual correlation. As a result, the sub-fund may invest to a greater or lesser extent in one or several themes, sectors or regions.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World EUR - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the reference portfolio MSCI All Countries World EUR - Net Return Index and a reduction of 50% by 2030 compared to the reference portfolio MSCI All Countries World EUR - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies that operate in a responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of concentration risk: there is a concentration of investments in the shares of companies that operate in a responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.

- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market. There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund

Minimum Variance Responsible Investing (in Euro)

	1 st half of year
Purchases	73,825,675.84
Sales	78,646,133.57
Total 1	152,471,809.41
Subscriptions	10,998,502.29
Redemptions	17,540,550.33
Total 2	28,539,052.62
Monthly average of total assets	226,082,562.31
Turnover rate	54.82%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect the impact of updated quantitative input signals. Turnover can exceed 150% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Classic Shares

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

KBC Equity Fund Minimum Variance Responsible Investing Institutional Shares DIS
Annual performance from 01/07/2016 through 30/06/2024 (in EUR)
The cumulative returns are shown where they relate to a period of at least one year.

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6295397978	EUR	13.78%		8.09%		8.70%				27/06/2017	7.39%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Institutional Shares

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,311%
Transaction costs: 0,093%

Institutional Shares Capitalisation :

Ongoing charges : 0,610%
Transaction costs: 0,093%

Discretionary Shares Capitalisation :

Ongoing charges : 0,659%
Transaction costs: 0,093%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.01%	of the net assets of the sub-fund per year.

Institutional Shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Initial subscription price: 444.36 EUR
Currency: EUR

Institutional Discretionary Shares Capitalisation

Launch date: 15 February 2024
Initial subscription price: 100 EUR
Currency: EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in Asian countries where conditions are such as to allow on accelerated economic growth in the short or medium term.

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets Asia - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies from Asian countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies from Asian countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies from Asian countries.
 - a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund New Asia (in Euro)

	1st half of year
Purchases	114,494,190.71
Sales	143,396,453.50
Total 1	257,890,644.21
Subscriptions	8,859,758.72
Redemptions	35,538,852.53
Total 2	44,398,611.25
Monthly average of total assets	248,572,456.82
Turnover rate	85.89%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,833%
Transaction costs: 0,357%

Classic Shares Distribution :

Ongoing charges : 1,842%
Transaction costs: 0,357%

Institutional B Shares Capitalisation :

Ongoing charges : 0,468%
Transaction costs: 0,357%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 54,49% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2. Information on KBC Equity Fund New Shares

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date: 1 April 1999

Initial subscription price: 500 EUR

Currency: EUR

Distribution

Launch date: 1 April 1999

Initial subscription price: 500 EUR

Currency: EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares that have been admitted for listing on a regulated market, where conditions are such as to allow accelerated economic growth in the short or medium term. The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund New Shares (in Euro)

	1 st half of year
Purchases	2,944,627.84
Sales	3,781,251.50
Total 1	6,725,879.35
Subscriptions	196,539.47
Redemptions	1,079,377.47
Total 2	1,275,916.94
Monthly average of total assets	17,598,085.58
Turnover rate	30.97%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
	Subscriptions		Redemptions		End of period

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Capitalisation :

Ongoing charges : 1,751%
Transaction costs: 0,051%

Distribution :

Ongoing charges : 1,772%
Transaction costs: 0,051%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,83% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of these assets are invested in shares of American and Canadian companies.

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from the United States of America and Canada.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from the United States of America and Canada.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from the United States of America and Canada.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be

shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund North America (in American dollar)

	1 st half of year
Purchases	1,561,340,530.12
Sales	1,663,051,744.37
Total 1	3,224,392,274.49
Subscriptions	188,402,702.30
Redemptions	299,151,679.55
Total 2	487,554,381.85
Monthly average of total assets	2,329,536,665.25
Turnover rate	117.48%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,713%
Transaction costs: 0,044%

Classic Shares Distribution :

Ongoing charges : 1,740%
Transaction costs: 0,044%

Institutional B Shares Capitalisation :

Ongoing charges : 0,459%
Transaction costs: 0,044%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,645%
Transaction costs: 0,044%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 62,20% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 27.008,29 USD and for the Management Company 10.803,32 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 21681399.56674 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
POWER CORP OF CANADA	CAD	200 000	38,02	5 557 054,41
Total				5 557 054,41
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
FRENCH REPUBLIC G 0.75 25MAY53 144A	EUR	11 924 092	USD	6 118 734,36
Total				6 118 734,36

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,23	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	5.557.057,77	USD
proportion of the collective investment undertaking's assets under management (AUM)	0,23	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
French Republic	6.118.734,36	USD

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	USD

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
FRENCH REPUBLIC G 0.75 25MAY53 144A	NR	EUR	above one year

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
1	Bank of New York	6.118.734,36	USD

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil
--	-----

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return USD	41.551,22	10.803,32	3.739,61
percentage of overall returns	100,00 %	26,00%	9,00%
cost USD	14.542,93		
percentage of overall returns	35,00 %

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from the United States and Canada.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the

objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;

- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Required disclaimers for benchmark providers:

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective

investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Redemptions	110,866,233.52
Total 2	384,885,666.24
Monthly average of total assets	2,177,832,648.06
Turnover rate	118.36%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

BE6307776607

KBC Equity Fund North America Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/07/2018 through 30/06/2024 (inUSD)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307776607	USD	22.16%	23.42%	4.29%	8.37%					05/11/2018	5.55%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,740%

Transaction costs: 0,043%

Institutional B Shares Capitalisation :

Ongoing charges : 0,460%

Transaction costs: 0,043%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable

Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 3.075,69 USD and for the Management Company 1.230,28 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 10508567.389783 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
BANK OF NOVA SCOTIA	CAD	64 000	62,58	2 926 968,67
POWER CORP OF CANADA	CAD	300 000	38,02	8 335 581,61
Total				11 262 550,28
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
SPAIN GOVERNMENT 3.45 31OCT34 144A	EUR	11 227 000	USD	12 338 313,96
Total				12 338 313,96

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,47	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	11.262.557,10	USD
proportion of the collective investment undertaking's assets under management (AUM)	0,47	%

Concentration data:

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares. Correlated financial instruments refer to certificates representing securities, such as American Depository Receipts (ADRs), Global Depository Receipts (GDRs) or futures on equity indices.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are, directly or indirectly, mainly invested in shares of companies from the North American Continent.

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund North American Continent (in Euro)

	1 st half of year
Purchases	1,212,511,235.89
Sales	1,291,063,213.81
Total 1	2,503,574,449.71
Subscriptions	139,092,075.44
Redemptions	226,710,096.86
Total 2	365,802,172.30
Monthly average of total assets	1,803,409,718.61
Turnover rate	118.54%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,692%

Transaction costs: 0,046%

Classic Shares Distribution :

Ongoing charges : 1,736%

Transaction costs: 0,046%

Institutional B Shares Capitalisation :

Ongoing charges : 0,460%

Transaction costs: 0,046%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 51,43% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 21.149,95 EUR and for the Management Company 8.459,98 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 18167533.32 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
POWER CORP OF CANADA	CAD	170 000	38,02	4 407 274,31
Total				4 407 274,31
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
UNITED KINGDOM GILT 4.0 22OCT63	GBP	4 522 748	EUR	4 851 766,00
Total				4 851 766,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,24	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	4.407.276,98	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,24	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
United Kingdom of Great Britai	4.851.766,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
Nil	Nil	Nil	Nil	Nil

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
UNITED KINGDOM GILT 4.0 22OCT63	NR	EUR	above one year

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
1	Bank of New York	4.851.766,00	EUR

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil
--	-----

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return EUR	32.538,39	8.459,98	2.928,46
percentage of overall returns	100,00 %	26,00%	9,00%
cost EUR	11.388,44		
percentage of overall returns	35,00 %

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from continental North America .

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the

objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;

- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Required disclaimers for benchmark providers:

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares EUR: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund North American Continent Responsible Investing (in American dollar)

	1 st half of year
Purchases	1,550,658,274.50
Sales	1,388,316,793.97
Total 1	2,938,975,068.46
Subscriptions	273,391,825.62
Redemptions	108,391,665.46
Total 2	381,783,491.08
Monthly average of total assets	2,162,142,889.81
Turnover rate	118.27%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Institutional B Shares EUR

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$\frac{NIW(D)}{NIW(Y)}^{[1/X]} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$\frac{NIW(D)}{NIW(S)}^{[1/F]} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 0,000%

Transaction costs: 0,043%

Institutional B Shares EUR Capitalisation :

Ongoing charges : 0,460%

Transaction costs: 0,043%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 0% of its fee with the distributor, and institutional and/or professional parties. If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares EUR

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 2.971,63 USD and for the Management Company 1.188,65 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 10551239.570795 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024					
Name	Currency	Quantity	Price	Value in currency of the portfolio	
BANK OF NOVA SCOTIA	CAD	65 000	62,58	2 972 702,55	
POWER CORP OF CANADA	CAD	300 000	38,02	8 335 581,61	
Total				11 308 284,16	
Details of collateral received for securities lent					
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio	
BONOS Y OB DEL ESTADO 1.45 16FEB71	EUR	995 000	USD	515 510,68	
SPAIN GOVERNMENT 3.45 30JUL43 144A	EUR	5 990 000	USD	6 236 391,07	
SPAIN GOVERNMENT B 3.9 30JUL39 144A	EUR	4 981 000	USD	5 634 310,86	
Total				12 386 212,61	

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,48	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	11.308.291,01	USD
proportion of the collective investment undertaking's assets under management (AUM)	0,48	%

Concentration data:

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested, directly or indirectly, in a selection of euro-area shares that are sufficiently liquid, the object being to outperform the MSCI EMU index in the long term.

The stock picking is based on purely quantitative criteria, using data available on companies in the euro area. The data concerned are widely used by financial analysts and readily available to them. These criteria are incorporated in a quantitative model designed by KBC Asset Management. The basic principle of this model is that share prices do not always accurately reflect the fundamental value of the company concerned, but that this value can be estimated provided that enough information is available and it can be processed efficiently. Share prices gradually change to better reflect these fundamental values. How this happens depends on the prevailing market cycle. The quantitative model developed by KBC Asset Management makes a regular assessment – at least once a month – of the cyclical trend in relation to criteria specific to the company and identifies which criteria are positive or negative in the prevailing market situation. This sensitivity to the market is reviewed on a regular basis and is used to classify which shares in the euro area are sufficiently liquid. Stock picking occurs at the same frequency as the assessment of the market sensitivity.

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Transparency of adverse sustainability impacts:

Required disclaimers for benchmark providers:

2.4.5. Performance figures

Not applicable.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Not applicable

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the **sub-fund's shares** by using multiple distribution channels. It is in the interests of the **holders of shares of a sub-fund** and of the distributor for the largest possible **number of shares** to be sold and for the assets of **a sub-fund** to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

The fund is actively managed with reference to the following benchmark: MSCI Europe Ex EMU - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective

investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be

shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund Rest of Europe (in Euro)

	1 st half of year
Purchases	411,376,096.67
Sales	469,360,241.26
Total 1	880,736,337.93
Subscriptions	34,795,391.95
Redemptions	111,226,039.91
Total 2	146,021,431.86
Monthly average of total assets	752,735,545.35
Turnover rate	97.61%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C₀ * ... * C_N.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Ongoing charges : 0,467%

Transaction costs: 0,221%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 185.321,09 EUR and for the Management Company 74.128,44 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 7, with a market value fluctuating between 0 and 114984178.39 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Europe Ex EMU - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Europe Ex EMU - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI Europe Ex EMU - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
Corporate events, such as a merger of one company with another, where the merged company can no longer be

- considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI Europe Ex EMU - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

The investment in transferable securities and/or money market instruments of issuer Novo Nordisk exceeded 10% (10.10%) of the assets. The situation is being rectified in the interests of the investors.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by

movements in exchange rates.

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024
SWISS FRANC	32.02	38.53	36.69	34.15
DANISH KRONE	9.61	8.93	10.97	15.35
EURO	0.20	-0.18	-0.09	0.89
POUND STERLING	48.50	45.44	42.54	34.61
NORWEGIAN KRONE	2.59	2.15	1.81	3.42
SWEDISH KRONA	7.08	5.13	7.93	11.64
US DOLLAR	0.00	0.00	0.15	-0.06
TOTAL	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund Rest of Europe Responsible Investing (in Euro)

	1st half of year
Purchases	467,252,721.23
Sales	595,132,259.13
Total 1	1,062,384,980.36
Subscriptions	37,591,769.57
Redemptions	172,596,153.61
Total 2	210,187,923.18
Monthly average of total assets	765,517,822.80
Turnover rate	111.32%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.5. Performance figures

Classic Shares

BE6307779635

KBC Equity Fund Rest of Europe Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/07/2018 through 30/06/2024 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307779635	EUR	12.24%	15.92%							05/11/2018	0.57%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,758%
Transaction costs: 0,273%

Institutional B Shares Capitalisation :

Ongoing charges : 0,469%
Transaction costs: 0,273%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 181.305,01 EUR and for the Management Company 72.522,00 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 7, with a market value fluctuating between 0 and 113172692.65 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested, directly or indirectly, in a selection of shares in global companies. The manager has autonomy in the stock picking, which is theme-based. As a result, the sub-fund's investments may at any time be focused to a greater or lesser extent on one or more very specific themes. Some examples of these themes (this list is not exhaustive) are family companies, holding companies with a greater average undervaluation in relation to their intrinsic value, and global companies that generate a significant percentage of their turnover in emerging countries.

The fund is actively managed without referring to any benchmark.

Transparency of adverse sustainability impacts:

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the **sub-fund's shares** by using multiple distribution channels. It is in the interests of the **holders of shares of a sub-fund** and of the distributor for the largest possible **number of shares** to be sold and for the assets of **a sub-fund** to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares selected from a globally diversified universe.

The manager has great freedom in the selection of shares. This selection is done from a thematic perspective. As a result the sub-fund may invest in one or more very specific themes, in large or smaller concentrations.

Examples (non-exhaustive) of themes are companies with a strong focus on innovation, companies that operate in a sustainable way in the water and energy sector, global companies with a relatively high proportion of their turnover in emerging markets,...

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 7.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas

intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of KBC Equity Fund Strategic Satellites (in Euro)

	1 st half of year
Purchases	166,787,991.58
Sales	70,150,993.81
Total 1	236,938,985.39
Subscriptions	104,665,263.81
Redemptions	3,612,136.84
Total 2	108,277,400.65
Monthly average of total assets	132,843,455.02
Turnover rate	96.85%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,725%

Transaction costs: 0,215%

Classic Shares Distribution :

Ongoing charges : 1,784%

Transaction costs: 0,215%

Institutional B Shares Capitalisation :

Ongoing charges : 0,000%

Transaction costs: 0,215%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 52,38% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 3.248,95 EUR and for the Management Company 1.299,58 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 3327741.75 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in shares of companies operating in areas which, according to the manager, fit with the theme 'challenges and opportunities that will apply during this and subsequent decades'. The manager focuses mainly on shares of emerging market companies, companies involved in urban development, those involved in prospecting and mining of natural resources and companies whose business focuses on long-term trends of demographics, globalisation, healthcare, technology and innovation.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective

investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.2. Balance sheet

Balance sheet layout		30/06/2024 (in Euro)	30/06/2023 (in Euro)
	TOTAL NET ASSETS	780,394,673.08	713,083,670.61

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Trends (in Euro)

	1 st half of year
Purchases	55,642,766.21
Sales	77,524,906.10
Total 1	133,167,672.30
Subscriptions	17,039,147.16
Redemptions	42,286,329.96
Total 2	59,325,477.13
Monthly average of total assets	758,796,643.79
Turnover rate	9.73%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,747%
Transaction costs: 0,024%

Classic Shares Distribution :

Ongoing charges : 1,750%
Transaction costs: 0,024%

Institutional B Shares Capitalisation :

Ongoing charges : 0,467%
Transaction costs: 0,024%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,665%
Transaction costs: 0,024%

Institutional F Shares LU Capitalisation :

Ongoing charges : 1,660%
Transaction costs: 0,024%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 55,38% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 36.649,83 EUR and for the Management Company 14.659,93 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 2 and 7, with a market value fluctuating between 1896514.68 and 18467588.09 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024					
Name	Currency	Quantity	Price	Value in currency of the portfolio	
BLOOM ENERGY CORP- A	USD	144 000	12,24	1 644 562,63

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund's portfolio is managed passively.

More information with respect to this can be found under the 'Benchmark-tracking' title.

The assets are invested primarily in equities (or equity-related investments) figuring in the MSCI USA Small Cap - Net return index.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), within the limited limits inherent to passive management, through the general exclusion policy and the Proxy Voting and Engagement Policy.

In particular, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems.

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Benchmark-tracking

The objective of the sub-fund is to track the composition of a benchmark in accordance with and within the limits of Article 63 of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Directive 2009/65/EC.

Benchmark(s) in question: MSCI USA Small Cap - Net return index, which consists of a selection of stocks of smaller U.S. listed companies, covering all sectors. Additional information on this benchmark and its composition can be found on the following website: www.msci.com.

Benchmark tracking method: physical replication using Optimized Sampling. The benchmark is tracked using a selection of shares in the benchmark in order to best replicate the benchmark. In addition, an optimisation algorithm is used that balances the risk and the return of each of the portfolio positions, so optimising the selection. The sub-fund may also make limited use of synthetic replication by way of futures, primarily in order to cushion the effects of buying and selling, and to avoid the attendant transaction charges.

The benchmark is rebalanced every quarter. The more often an benchmark is rebalanced, the greater the potential

impact on the transaction charges within the sub-fund.

Given normal market conditions, the expected tracking error is between 0% and 1%. Possible causes of this tracking error could be the method used to track the benchmark, transaction charges, dividend reinvestment, the general costs charged to the sub-fund, any income from lending financial instruments .

If the composition of the benchmark is no longer sufficiently diversified or if the benchmark is no longer sufficiently representative of the market it relates to or if the value and composition of the benchmark is no longer published in a suitable manner, the management company will inform the Board of Directors without delay. The Board of Directors will consider what action to take in the interest of investors and may convene a general meeting of shareholders in order to amend the investment policy.

Required disclaimers for benchmark providers:

This fund is not sponsored, endorsed, sold or promoted by MSCI INC. ('MSCI'), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the 'MSCI parties'). General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE0168342476) calculated in the currency of the share.

Tracking error: 0,43%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Distribution share (ISIN-code: BE0168341460) calculated in the currency of the share.

Tracking error: 0,43%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE6228910558) calculated in the currency of the share.

Tracking error: 0,43%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE6348158906) calculated in the currency of the share.

Tracking error: % is shown where it relates to a period of at least one year.

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error cannot be calculated yet because the share is less than a year old.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024

2.4.2. Changes in the composition of the assets of KBC Equity Fund US Small Caps (in American dollar)

	1st half of year
Purchases	35,935,211.40
Sales	11,676,893.88
Total 1	47,612,105.28
Subscriptions	34,785,914.31
Redemptions	10,511,242.91
Total 2	45,297,157.22
Monthly average of total assets	94,628,688.68
Turnover rate	2.45%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Institutional B Shares

Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 54,53% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 0.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	

Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 1.959,14 USD and for the Management Company 783,66 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 4, with a market value fluctuating between 0 and 287070.4 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

Name	Currency	Quantity	Price	Value in currency of the portfolio
LUCID GROUP INC	USD	26 000	2,61	67 860,00
PLUG POWER INC	USD	10 400	2,33	24 232,00
Total				92 092,00

Details of collateral received for securities lent

Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
REPUBLIC OF AUSTRI 0.0 20OCT40 144A	EUR	44 000	USD	28 227,75
SPAIN GOVERNMENT B 0.7 30APR32 144A	EUR	1 000	USD	891,70
SPAIN GOVERNMENT 3.45 31OCT34 144A	EUR	69 000	USD	75 829,53
Total				104 948,98

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,09	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	92.092,00	USD
proportion of the collective investment undertaking's assets under management (AUM)	0,09	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
Kingdom of Spain	76.721,22	USD
Republic of Austria	28.227,75	USD

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	BARCLAYS CAPITAL SECURITIES LTD., LONDON	UK	0,00	USD
equity (Goldman Sachs)	Goldman Sachs International	UK	0,00	USD

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are, directly or indirectly, mainly invested in shares of companies from North America.

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The long-term expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/12/2022	30/06/2023	30/12/2023	30/06/2024
CANADIAN DOLLAR	4.71	3.95	3.58	2.48
EURO	-0.04	-0.03	-0.05	-0.05

TOTAL	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund USA & Canada (in Euro)

	1 st half of year
Purchases	1,218,320,844.46
Sales	1,294,586,874.97
Total 1	2,512,907,719.43
Subscriptions	139,564,922.14
Redemptions	224,642,763.29
Total 2	364,207,685.43
Monthly average of total assets	1,810,945,993.11
Turnover rate	118.65%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,686%

Transaction costs: 0,045%

Classic Shares Distribution :

Ongoing charges : 1,730%

Transaction costs: 0,045%

Institutional B Shares Capitalisation :

Ongoing charges : 0,460%

Transaction costs: 0,045%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 55,92% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 21.243,48 EUR and for the Management Company 8.497,39 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 4, with a market value fluctuating between 0 and 18078347.12 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024					
Name	Currency	Quantity	Price	Value in currency of the portfolio	
POWER CORP OF CANADA	CAD	170 000	38,02	4 407 274,31	
Total				4 407 274,31	
Details of collateral received for securities lent					
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio	
FRANCE 1993 6,00% 25/10/2025	EUR	4 532 243	EUR	4 851 766,00	
Total				4 851 766,00	

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,24	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	4.407.276,98	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,24	%

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from North America.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
Corporate events, such as a merger of one company with another, where the merged company can no longer be

- considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund USA & Canada Responsible Investing (in Euro)

	1 st half of year
Purchases	1,424,918,337.34
Sales	1,275,940,240.62
Total 1	2,700,858,577.96
Subscriptions	251,936,793.51
Redemptions	100,200,251.47
Total 2	352,137,044.98
Monthly average of total assets	2,000,546,913.04
Turnover rate	117.40%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives

positions

2.4.5. Performance figures

Classic Shares

BE6307763472

KBC Equity Fund USA & Canada Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/07/2023 through 30/06/2024 (in EUR)

The cumulative returns are shown where they relate to a period of at least one year.

Institutional B Shares

BE6307764488

KBC Equity Fund USA & Canada Responsible Investing Institutional B Shares CAP

Annual performance compared to the benchmark from 01/07/2019 through 30/06/2024 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307764488	EUR	25.95%	25.64%	9.33%	12.09%	13.22%	13.40%			05/11/2018	13.06%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Institutional B Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1 / X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1 / F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 0,000%

Transaction costs: 0,043%

Institutional B Shares Capitalisation :

Ongoing charges : 0,460%

Transaction costs: 0,043%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 0% of its fee with the distributor, and institutional and/or professional parties. If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 2.760,06 EUR and for the Management Company 1.104,03 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 10551239.58 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024					
Name	Currency	Quantity	Price	Value in currency of the portfolio	
BANK OF NOVA SCOTIA	CAD	65 000	62,58	2 773 690,28	
POWER CORP OF CANADA	CAD	300 000	38,02	7 777 542,91	
Total				10 551 233,19	
Details of collateral received for securities lent					
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio	
SPAIN GOVERNMENT B 3.9 30JUL39 144A	EUR	10 950 000	EUR	11 556 995,00	
Total				11 556 995,00	

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,48	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	10.551.239,56	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,48	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
Kingdom of Spain	11.556.995,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
Nil	Nil	Nil	Nil	Nil

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
SPAIN GOVERNMENT B 3.9 30JUL39 144A	NR	EUR	above one year

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
1	Bank of New York	11.556.995,00	EUR

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil
--	-----

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return EUR	4.246,25	1.104,03	382,16
percentage of overall returns	100,00 %	26,00%	9,00%
cost EUR	1.486,19		
percentage of overall returns	35,00 %

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that are contributing to the medical well-being of society through their products and services, such as:

- Production and development of medicine
- Biotech
- Medical technology
- Diagnostics, symptom recognition and tests
- Digital health care
- Care for elderly and sick people
- Outsourcing of medical activities
- Distribution of medical supplies
- Health and life insurance
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening

also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% from 75% of the benchmark value by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

In order to reflect the specific theme related characteristics of this sub-fund, a unique starting point will apply for the calculation of the greenhouse gas intensity reduction path, which can be higher or lower than the benchmark (MSCI All Countries World - Net Return Index).

The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals

include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

K&H Classic Shares HUF: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Care Responsible Investing (in Euro)

	1 st half of year
Purchases	64,898,770.05
Sales	39,521,567.25
Total 1	104,420,337.31
Subscriptions	61,377,961.08
Redemptions	40,009,132.54
Total 2	101,387,093.62
Monthly average of total assets	549,399,390.20
Turnover rate	0.55%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Classic Shares Distribution :

Ongoing charges : 1,803%
Transaction costs: 0,022%

Institutional B Shares Capitalisation :

Ongoing charges : 0,468%
Transaction costs: 0,022%

K&H Classic Shares HUF Capitalisation :

Ongoing charges : 2,052%
Transaction costs: 0,022%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,784%
Transaction costs: 0,022%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 58,57% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 21.377,85 EUR and for the Management Company 8.551,14 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 22805284.97 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
SWISS LIFE HOLDING AG-REG	CHF	2 300	660,60	1 577 642,33
Total				1 577 642,33
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
FRENCH REPUBLIC G 0.75 25MAY52 144A	EUR	3 087 999	EUR	1 515 243,00
FRENCH REPUBLIC GOVERNMENT 2.0 25NOV32	EUR	207 203	EUR	190 779,00
Total				1 706 022,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,27	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	1.577.634,88	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,27	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
French Republic	1.706.022,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund aims to generate a return by investing primarily in shares of companies whose products and services support the digital evolution, such as:

- Electronics
- Big data and artificial intelligence
- Quantum computing
- Cloud services and cloud computing
- Cybersecurity
- Semiconductors
- Data services to companies
- Software for professional purposes
- IT consultancy
- Network infrastructure
- Digital marketplaces
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% from 75% of the benchmark value by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

In order to reflect the specific theme related characteristics of this sub-fund, a unique starting point will apply for the calculation of the greenhouse gas intensity reduction path, which can be higher or lower than the benchmark (MSCI All Countries World - Net Return Index).

The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

There is no capital protection.

Classic Shares CSOB CZK: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Digitize Responsible Investing (in American dollar)

	1 st half of year
Purchases	288,695,438.50
Sales	205,066,177.75
Total 1	493,761,616.25
Subscriptions	158,469,358.24
Redemptions	74,943,787.35
Total 2	233,413,145.60
Monthly average of total assets	753,122,989.80
Turnover rate	34.57%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares CSOB CZK

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$\frac{NIW(D)}{NIW(Y)} ^ {1 / X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$\frac{NIW(D)}{NIW(S)} ^ {1 / F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,837%
Transaction costs: 0,043%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 56,71% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of

		the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% from 75% of the benchmark value by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

In order to reflect the specific theme related characteristics of this sub-fund, a unique starting point will apply for the calculation of the greenhouse gas intensity reduction path, which can be higher or lower than the benchmark (MSCI All Countries World - Net Return Index).

The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting

and Engagement Policy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.2. Balance sheet

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Like Responsible Investing (in Euro)

	1 st half of year
Purchases	21,830,989.03
Sales	56,500,298.33
Total 1	78,331,287.36
Subscriptions	5,624,584.31
Redemptions	14,554,101.14
Total 2	20,178,685.45
Monthly average of total assets	158,802,188.33
Turnover rate	36.62%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,799%
Transaction costs: 0,050%

Classic Shares Distribution :

Ongoing charges : 1,813%
Transaction costs: 0,050%

Institutional B Shares Capitalisation :

Ongoing charges : 0,514%
Transaction costs: 0,050%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,723%
Transaction costs: 0,050%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 56,71% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 1.080,34 EUR and for the Management Company 432,14 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 2144869.01 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	0,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	Nil	%

Concentration data:

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that cater for products and services that consumers need in everyday life, such as:

- Utilities for water, Internet and electricity, for example
- Computer equipment, software and communication devices for everyday use
- Food and beverages
- Household goods
- Products for hygiene and daily care
- Household appliances
- DIY items
- Textiles and clothing
- E-commerce
- Everyday banking
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking

into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Live Responsible Investing (in Euro)

	1 st half of year
Purchases	25,295,994.33
Sales	30,474,719.64
Total 1	55,770,713.97
Subscriptions	7,708,397.70
Redemptions	11,627,022.03
Total 2	19,335,419.73
Monthly average of total assets	126,831,804.83
Turnover rate	28.73%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets

(excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,803%
Transaction costs: 0,041%

Classic Shares Distribution :

Ongoing charges : 1,820%
Transaction costs: 0,041%

Institutional B Shares Capitalisation :

Ongoing charges : 0,448%
Transaction costs: 0,041%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,794%
Transaction costs: 0,041%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 54,93% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 3.794,60 EUR and for the Management Company 1.517,84 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 2522910.3 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024				
Name	Currency	Quantity	Price	Value in currency of the portfolio
ELIA GROUP SA/NV	EUR	3 100	87,45	271 095,00
Total				271 095,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
UK 2009 4.50% 07/09/2034	GBP	244 765	EUR	298 771,00
Total				298 771,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,21	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	271.095,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,21	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
United Kingdom of Great Britai	298.771,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	Citigroup Global Markets Limited	UK	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
UK 2009 4.50% 07/09/2034	NR	EUR	above one year

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
1	Bank of New York	298.771,00	EUR

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil
--	-----

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return EUR	5.837,84	1.517,84	525,41
percentage of overall returns	100,00 %	26,00%	9,00%
cost EUR	2.043,24		
percentage of overall returns	35,00 %

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that are shaping the society of the future through their products and services, such as:

- Automation and robotisation
- Solutions for energy transition and storage
- Infrastructure and installations for transport and freight vehicles
- Facilities needed in a circular economy
- Water purification, soil decontamination and air quality improvement
- Machines and installations for more efficient agriculture and forestry
- Industrial plants and machines
- Building materials and construction activities
- Materials
- Logistical solutions
- Credit facilities and financial services to companies and governments
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on

www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Indexes and a reduction of 50% by 2030 from the benchmark 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: 20% MSCI All Countries World Materials - Net Return Index, 55% MSCI All Countries World Industrials - Net Return Index, 25% MSCI All Countries World Financials - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Shape Responsible Investing (in Euro)

	1st half of year
Purchases	36,802,371.35
Sales	68,503,612.24
Total 1	105,305,983.59
Subscriptions	4,628,984.64
Redemptions	35,098,794.26
Total 2	39,727,778.90
Monthly average of total assets	203,612,393.70
Turnover rate	32.21%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,781%
Transaction costs: 0,047%

Classic Shares Distribution :

Ongoing charges : 1,793%
Transaction costs: 0,047%

Institutional B Shares Capitalisation :

Ongoing charges : 0,465%
Transaction costs: 0,047%

Classic Shares CSOB CZK Capitalisation :

Ongoing charges : 1,825%
Transaction costs: 0,047%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 54,39% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 7.247,25 EUR and for the Management Company 2.898,90 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 8768589.47 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in shares and/or share-related investment that may come from any region, sector or theme.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'.

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.2. Balance sheet

Balance sheet layout		30/06/2024 (in Euro)	30/06/2023 (in Euro)

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund World (in Euro)

	1 st half of year
Purchases	1,443,455,110.49
Sales	1,602,928,795.45
Total 1	3,046,383,905.94
Subscriptions	165,381,560.55
Redemptions	343,932,910.61
Total 2	509,314,471.16
Monthly average of total assets	2,549,106,884.56
Turnover rate	99.53%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Capitalisation :

Ongoing charges : 1,716%

Transaction costs: 0,094%

Classic Shares Distribution :

Ongoing charges : 1,850%

Transaction costs: 0,094%

Institutional B Shares Capitalisation :

Ongoing charges : 0,459%

Transaction costs: 0,094%

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 100.460,13 EUR and for the Management Company 40.184,05 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 1 and 28, with a market value fluctuating between 241712.99 and 85102564.89 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations. The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

At least 95% of the assets are invested in a worldwide selection of shares.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

The fund is actively managed with reference to the following benchmark: MSCI World-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), through the general exclusion policy and the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability factors that were taken into account through the general exclusion policy, were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to companies active in the fossil fuel sector ('indicator 4'), gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be

shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund World DBI-RDT (in Euro)

	1 st half of year
Purchases	167,847,057.51
Sales	209,891,322.34
Total 1	377,738,379.85
Subscriptions	37,592,104.50
Redemptions	71,780,295.36
Total 2	109,372,399.86
Monthly average of total assets	286,549,743.15
Turnover rate	93.65%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

BE6313419770

KBC Equity Fund World DBI-RDT Classic Shares DIS

Annual performance compared to the benchmark from 01/07/2019 through 30/06/2024 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6313419770	EUR	21.00%	22.35%	7.23%	10.53%	8.77%	13.13%			28/06/2019	8.76%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{1/X} - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{1/F} - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
For dividend i on date Di with value Wi:

$$C_i = [W_i / NIW(D_i)] + 1$$
i = 1 ... N
from which C = C0 * ... * CN.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

2.4.6. Costs

Ongoing Charges and Transaction costs:

Classic Shares Distribution :

Ongoing charges : 1,783%
Transaction costs: 0,077%

Corporate Shares Distribution :

Ongoing charges : 1,425%
Transaction costs: 0,077%

Corporate Wealth shares Distribution :

Ongoing charges : 1,192%
Transaction costs: 0,077%

Discretionary Shares Distribution :

Ongoing charges : 1,020%
Transaction costs: 0,077%

Institutional Shares Distribution :

Ongoing charges : 0,558%
Transaction costs: 0,077%

Institutional Discretionary Shares Distribution :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 52,94% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those

		assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations. The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

At least 95% of the assets are invested in a worldwide selection of shares.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI World-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI World-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI World-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed

by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

US DOLLAR	67.00	66.22	67.64	74.19
TOTAL	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of KBC Equity Fund World DBI-RDT Responsible Investing (in Euro)

	1 st half of year
Purchases	85,323,634.37
Sales	72,332,108.44
Total 1	157,655,742.81
Subscriptions	23,337,150.27
Redemptions	10,450,581.97
Total 2	33,787,732.24
Monthly average of total assets	145,805,061.03
Turnover rate	84.95%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework and 4) changes to the DBI universe. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

Classic Shares

BE6321630434

KBC Equity Fund World DBI-RDT Responsible Investing Classic Shares DIS

Annual performance compared to the benchmark from 01/07/2020 through 30/06/2024 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6321630434	EUR	20.34%	22.35%	6.11%	10.53%					29/06/2020	10.76%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Transaction costs: 0,075%

Discretionary Shares Distribution :

Ongoing charges : 1,034%
Transaction costs: 0,075%

Institutional Shares Distribution :

Ongoing charges : 0,632%
Transaction costs: 0,075%

Institutional Discretionary Shares Distribution :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those

		assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Corporate Shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in a worldwide selection of shares from any region, sector or theme.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the

objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals**.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI All Countries World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;

- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of KBC Equity Fund World Responsible Investing (in Euro)

	1 st half of year
Purchases	1,490,128,158.58
Sales	1,353,836,016.62
Total 1	2,843,964,175.19
Subscriptions	235,103,638.42
Redemptions	100,942,066.74
Total 2	336,045,705.16
Monthly average of total assets	2,394,027,401.54
Turnover rate	104.76%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

Classic Shares

BE6307728129

KBC Equity Fund World Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/07/2018 through 30/06/2024 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307728129	EUR	20.25%	21.52%	4.95%	9.05%					05/11/2018	9.59%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

* Return on annual basis.

Institutional B Shares

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

* Return on annual basis.

Discretionary Shares

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation

date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Ongoing charges : 1,708%
Transaction costs: 0,089%

Institutional B Shares Capitalisation :

Ongoing charges : 0,462%
Transaction costs: 0,089%

Discretionary Shares Capitalisation :

Ongoing charges : 0,000%
Transaction costs: 0,089%

Discretionary Shares Distribution :

Ongoing charges : 1,835%
Transaction costs: 0,089%

Institutional Discretionary Shares Capitalisation :

Ongoing charges : not applicable
Transaction costs: not applicable

Percentage calculated at reporting date: 30 June 2024 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

More information on how transaction costs are calculated: the transaction costs are not included in the ongoing charges, but are instead shown separately. Moreover, this does not fully reflect the actual transaction costs as only the explicit transaction costs are given.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 60,42% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2024 to 30/06/2024, the realised net income for the UCITS amounts to 80.723,73 EUR and for the Management Company 32.289,49 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 19, with a market value fluctuating between 0 and 51804847.09 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 28/06/2024
